BULLS RULE THE MARKET. New York, Sept. 16.—A rampant bull stock market on the first day of trading following the death by assassination of the president of the United States is an

of the country's prosperity. Powerful manipulation avowedly had its part in the day's rise in prices, especially the opening, which was designed to intimidate the speculative bear element; it not only had that effect, but caused a scram-ble to cover on the part of uncovered shorts, who looked for a further decline; there was also an abatement of orders to buy at prices below the market on the part of investors and bargain hunters, which served as a protection against bear aggression. There was a considerable element as well which looked for an opening break on prices and hoped to secure bargains by placing orders to buy at the markets. As the event proved, the opening market was from 3 to 6 points higher than on Friday afternoon.

CHICAGO, Sept. 16.—Strength in the stock list was a potent factor in firm, though quiet markets on the board of trade today. December wheat closed &c to 1/2c; December corn 7/2c and December oats 3/2c to 1/2c higher. Provisions closed 2/3/2c to 5/2c higher for January delivery. Exporters reported 17 loads taken. Seaboard clearances were 1,455,000 bu, and primary receipts 2,915,000 bu, compared with 1,592,000 bu last year. Local receipts were 172 cars, 7 of contract grade. Minneapolis and Duluth reported 2,229 cars, against 734 a year ago. Owing to the following the death by assassination of the president of the United States is an anomaly. Broadly stated that is what occurred today. There are grounds for explanation of the paradox, but the fact remains that no one, even the most sanguine, was prepared for the action of the day's stock market.

The day's events seemed to demonstrate a strong underlying confidence in the future of business, and the continuance of the country's prosperity. Powerful manipulation avowedly had its part in the day's rise in prices.

HIS PLATFORM!

Peace, Prosperity and Honor of the Country---Epitome of President's Policy.

Theodore Roosevelt has announced in some detail the policy he will follow during the next three years. Just before taking the oath of office he said, with much definiteness: "It shall be my aim to continue absolutely unbroken the policy of President McKinley for the "peace"-and he emphasized that word-presperity and honor of the country." Since then the president gathered together some personal friends, and gave to them such ideas as he had already established in his mind for the conduct of public affairs and his own policy. His views are here made public in almost the exact language used in discussing them with the cabinet and his friends:

"A more liberal and extensive reciprocity in the purchase and sales of commodities, so that the over-produc-tion of this country can be satisfactorily disposed of by fair and equitable arrangements with foreign countries. "The abolition entirely of commer cial war with other countries and the adeption of reciprocity treaties. "Abolition of such tariffs on foreign goods as are no longer needed for rity.
