Grand total85,325 The increase is doubly satisfactory oecause the restrictions upon immigration have closed the door upon persons who have no money and who might become public charges. Not only temperament counts for a good deal the quantity but the average quality in these affairs. "There will be no revof the newcomers is higher than ever

It is fifteen years since Henri Menier, the French chocolate king, secured from the English corporation known as the Island of Anticosti Company, Limited, proprietory rights in that island. In that period much has been accomplished in the development of its resources. This is clearly shown in an article by Henry Mann in the current issue of the Columbian Magazine.

M. Menier's first care in the exploitation of the island was devoted to doing a breach of professional etiquette? works of rudimentary development, the erection of buildings, the laying out of farms, the establishment of a hospital and of a church and schools, of a canning factory for the abundant! fisheries of the island coasts, the construction of roads and of two ports with dock accommodation for the arrival and departure of vessels. He next prepared for the development and utilization of the immense riches of forest and soil which had for so many ages been neglected.

Of the 2,700,000 acres of the island, 2,000,000 are covered with valuable! forests. These forests are the island's set out his plan in detail, illustrating it chief resource. The woods are of varjous kinds, fitted for ship-building, for ordinary works of construction and for of the head and round the back and over the paper industry. A pulp wood plant, equipped with the latest improved ma- stick mask. What you want is the prochinery, is being erected at a cost of tection of the neck against a backward \$400,000. The proprietor has made or forward wrench. The height of the careful provision for the prevention of waste, and for planting new trees to and the rubber, being moderately thick, take the place of the wood cut off, so far as the development of the island in other directions will justify.

Already the salmon canning industry has yielded encouraging results. The island's fishing fleet includes fifty that the head could be driven down on sailing vessels and one small steamer. the Alpha, of eighty tons. The abundance of the lobster off the coasts of Anticosti has given rise to another

profitable canning industry. The search for minerals

ing taken will show the presence of a horrid jar. What do the experts say?" petroleum within accessible depth.

Though the winters of Anticosti are long and severe, agriculture is progressing. In some cases over two tons of hay have been raised to the acre. Horses and horned cattle flourish on Let the woman wear the grace the pasturages, and experiments are in progress to determine the breed of Readers of the Advertiser are requested sheep best suited to the environment.
