WINNIPEG GRAIN MARKET.
Reported for The Advertiser

CHIC 0

Associated Press Despatch.
Chicago, Sept. 26.—Corn led the grain markets to higher price levels today in a manner that bordered on the sensational. Broadened speculative demand for corn came about chiefly from a summary issued by the United States department of agriculture, saying that for this time of year the corn crop is at present even more backward than a month ago. After scoring in some cases an extreme upturn of 6c, the corn market closed strong at 3% to 3% to 3% c net gain, December \$1.061/4 to \$1.061/2. Wheat finished firm, 1% to 3% to 10.661/2. Wheat finished firm, 1% to 3% to 10.661/2. Wheat finished firm, 1% to 10.661/2. Wheat finished firm, 1% to 10.661/2. Wheat for the combination of the corn implied that for the combination of the corn implied that for the combined effulte estimate of production would be lower than any total heretofore suggested. Under such circumstances, active general commission-house buying of corn quickly developed, and the market began a rapid irregular ascent that reached its topmost point just before trading ended.

Predictions of unsettled and colder weather did a great deal to stimulate

topmost point just before trading ended.

Predictions of unsettled and colder weather did a great deal to stimulate buyers after the upward swing got started in earnest, especially as killing frost in some sections was forecast.

The fact that before the buige the market was 13½c down, as compared with last week's top prices, had also a strengthening influence.

Wheat owed much of its advance to cold weather in Canada. Aided by reports that cash wheat at Winnipeg was above \$1.50 a bushel, the market here nearly equalled the best prices yet in crop. Estimates of world import needs received a bullish construction.

Oats were moderately active and Oats were moderately active and higher with other grain.

#### Live Stock CHICAGO.

Associated Press Despatch Chicago, Sept. 26.—Cattle — Receipts 000; practically no market on weighty fed steers; bulk fresh and stale offerings unsold at noon; numerous lots held off the market, some without bids: moderate demand for yearlings; no choice steers of any weight here; best long yearlings \$10.25; few loads \$9 to \$10; bulk rough fat weighty steers \$8 to \$9: some 1,372-pound averages \$9.90; top

Associated Press Despatch.

considerable hedging by elevator interests and some profit-taking by "longs," but this had little effect, the market seemingly gaining strength on each fresh advance. There were some traders, however, who were inclined to the belief that the advance had been sufficient for the time being, and that a reaction would place the market in a stronger technical position.

The future coarse grains were all showing strength in sympathy with wheat and the bullish United States corn report, and worked higher. Oatte gained about 1c, barley 2½c to 3c, flax 1c to 2c, and rye 2c to 3½c.

A good speculative demand came out.

#### WHEAT TRAFFIC THROUGH CANALS SHOWS INCREASE

Canadian Press Despatch. Ottawa Sept. 26.—Canal statistics compiled by the Dominion bureau of statistics show an increase in the quantity of wheat which passed through the St. Lawrence, Welland and Socianals during August of the present year as compared with August, 1923. Total traffic on the Welland canal last month was heavier than in August, 1923, by 81,107 tons, due almost entirely to

London Stock Exchange Has Little Activity as Parliament Meets.

Canadian Press Despatch.

London, Sept. 26.—A general feeling of hesitation on the stock exchange here is attributable to doubts as to what surprises and excitements the approaching parliamentary session may bring forth. Political and trade uncertainties tend to direct attention to first-class securities, while the expectations of a large proportion of the £50,000,000 government disbursements in war loan interest being reinvested in gilt edge securities have helped in the strengthening of those securities.

The proposed loan to Germany is the subject of much discussion. Judging from the greater readiness with which the foreign loan is being absorbed in the United States without considering the extent to which the matter may be affected by the size of the German balance in the United States, the market is reckoning that a least one-half of the loan should be subscribed for, though at all the centers something will depend on the terms of the issue and the character of the loan. The market holds the view that the middle of October is likely to be about the earliest date for the flotation, owing to the abnormal circumstances surrounding the Issue.

A feature of the market this week has been the pronounced flutter in Mexican securities. There is talk that a loan has been arranged in the United States, though the market here is seeking a definite reason for the violent rises. Some say that the time has arrived for the Americans to lend money to Mexico in order to put Mexico on her financial feet. Others think diplomatic objections may be overcome through the hypothecation by the Mexican government of its special rights to oil discoveries which may be made in the future.

Canadian stocks continue firm and in demand. Business in the Canadian Northern 5 per cent income debentures has been done up to £60.

There is talk of a committee being formed to represent the holders of Grand Trunk Pacific 4 per cent bonds. A large block held speculatively on behalf of Canadian interests is understood now to have been sold "steady" Canadian Press Despatch.

SUGAR

New York, Sept. 25.—No changes occurred in the raw sugar market today, Cubans remaining at \$6.03, duty raid. No sales were reported. Raw sugar futures were irregular, near months ruling higher on covering and trade buying, influenced by the firmness of the spot market. Later deliveries were lower under European hedge selling. The close was 2 points net lower. December closed at \$4.08, March \$3.33. May \$3.42, July \$3.52. Refined was unchanged to 10 points higher, list quotations now ranging from \$7.15 to \$7.50 for fine granulated. Continued good inquiry was reported. Refined futures were nominal
