Fine Furs

Made by practical people. If your old furs need remodeling bring them in now.

BELTZ

WORTH MILLION TO LONDON.

Editor Free Press: Track elevation would be such an untold benefit for the City of London that it is a wonder no more interest is taken in it. The railway officials want a good road and sand embankments have been found to be the best. The resistance to any scheme giving elevation over any streets of the growing city is simply incredible, and in view of the sure mortality ensuing criminal. Could you print the enclosed or part of it? London is acting in a very Chinese and childish way if it objects to embankments between streets. Track elevation is worth \$1,000,000 to London.
G. E. M. COX.
Hanover, Ont., Aug. 28.

AUCTIONEER'S BUSY DAY.

Auctioneer Jones had a busy afternoon yesterday. Besides selling several properties he disposed of the booths and spaces at the Western Fair grounds, which brought good prices. The Simonson property on Nightingale avenue was sold to Donald Steel for \$2,550.

A mortgage sale of the properties at 412-414 York street brought \$1,750, the purchaser being Mr. J. Beveler. A property at 406 Oxford street brought \$1,850.

Voice culture—singing—tone production.—Alfred Dunn, 25 Beaconsfield avenue.

Christy's Celebrated English Hats Stetson's Celebrated American Hats

In all their new Fall shapes are now opened.

GRAHAM BROS.

There's Only One Best

In Baking Powder—it is Strong's. There are a number of good reasons why it is best, but the three principal reasons are:
1st. Only the purest and finest materials are used. 2nd. It is all Baking Powder—no adulterants added to make weight. 3rd. It is always fresh and of full strength. Another very good reason is that it costs one-half the price of other good powders. Have you tried Strong's Baking Powder?

STRONG'S DRUG STORE
184 Dundas Street.

OUR FALL STOCK

is now open for inspection. It contains the newest fabrics from England, Scotland and Ireland. Anyone needing something in our line would do well to give us a call before ordering elsewhere.

PERSONAL ITEMS

Miss Ethel Fox is visiting friends in Toronto and Hamilton.

Miss Colver is visiting friends in this city, from Melrose.

Miss Ethel Allen, of Belmont, is visiting friends in this city.

Mr. W. H. Gilpin, of Toronto, is visiting friends in this city.

Mr. James Harrison, of Oakland, is visiting his brother here, Mr. Brenner Harrison.

Mrs. F. Butler, of Pittsburg, Pa., is the guest of Mrs. E. Barnes, York street east.

Mr. J. Long, of Brusse's, is spending a few days with Mr. Charles Sage, 228 York street.

Mr. Tom Tanton, of 379 Waterloo street, is spending a few days with friends in the country.

Miss Agness Sloan and niece, Verna Sloan, of Cleveland, Ohio, are visiting friends in this city.

Mr. and Mrs. J. S. Robinson, of Kent street, have returned from a visit to Dr. Sanderson, Carleton street, Toronto.

Mr. and Mrs. J. S. Power, of Talbot street, have returned from spending a month at Winona Beach, Lake Huron.

Mr. J. A. Fowler, of Cleveland, has returned home after visiting his cousins, the Misses Hobbins, 325 Hill street.

Misses Mary and Martha Barnes, of York street east, are the guests of their brother, Mr. T. T. Barnes, Toronto.

Mr. and Mrs. Clifford Dexter and little sons, of Huron, South Dakota, left for Chicago to-day, after spending a week with Mr. and Mrs. T. F. Dexter, Beaufort street, West London.

DEATH OF J. B. MURPHY

One of London's Best Known Citizens Passes Away.

One of London's best known and most respected citizens passed away yesterday at his home, 409 Dundas street, in the person of Mr. J. B. Murphy.

For a great many years Mr. Murphy conducted a meat market at 246 Dundas street and in this way became widely known and esteemed.

For some time Mr. Murphy had been unwell. He was 75 years of age and was survived by his wife, two sons and one daughter, Messrs. Frank and Philip Murphy and Miss Rose.

The funeral will take place from St. Peter's Cathedral to St. Peter's cemetery on Saturday morning.

INDUCTION IN LOBO.

The induction of Rev. James Argo took place yesterday at Melville Church, Lobo, in the presence of a large and deeply interested congregation.

The Rev. T. H. Mitchell, of St. James' Church, by appointment of the presbytery, preached the sermon. Rev. J. Lindsay, the present moderator, put the vows upon the minister-elect, and offered the induction prayer. The newly inducted minister was addressed by Rev. Dr. Munro, of London Township, and the congregation by Rev. W. H. Geddes, of Allisa Craig, on their respective duties. At the close a sumptuous dinner was partaken of by the congregation in the basement of the church.

The welcome given to Rev. Mr. Argo and wife by the congregation is very cordial. The manse is undergoing considerable improvements for their reception. Mrs. Argo is a sister of the Rev. Dr. Wilkie, a very successful missionary at Jhansi, India, who for many years did excellent work at Indore. Another sister, wife of Rev. J. Johnstone, of Paisley, occupied the same manse over twenty years ago.

WANTED TOO MUCH.

Ald. Wyatt, as chairman of the manufacturers' committee, was seen by some Albion, Mich., men in reference to a proposal to locate a branch of the National Spring and Wire Co., but as they wanted free site and building and exemption from taxation they were allowed to proceed to Brantford.

DOLBY-McHARG.

A pretty wedding took place at the residence of Mr. John McHarg, 579 Horton street, when his daughter, Miss Mabel, was married to Mr. Geo. R. Dolby. Rev. James Rollins performed the ceremony. Mr. and Mrs. Dolby will reside in this city.

Your Druggist Will Tell You Marine Eye Remedy Cures Eyes. Makes Weak Eyes Strong. Soothes Eye Pain. Doesn't Smart. Sells for 50c.

BOARD SEE SYSTEM OF HIGH PRESSURE

McClary's Best Protected Plant in London Says Fire Chief Clark

Yesterday afternoon the board of fire underwriters made an official test of the new high pressure system recently put in by the McClary Manufacturing Company, of this city. The test was eminently satisfactory to the underwriters and as a result, the McClary firm will effect a reduction of over 50 per cent. in their insurance rates.

Few manufacturers realize what this means to a large firm who have to pay thousands of dollars every year for insurance premiums. In the McClary case, for instance, it means that in a very few years the high pressure system, which cost approximately \$35,000 to install, will have paid for itself and besides the firm will have an efficient fire protection system of their own.

McClarys are the first firm in the city to put in one of these systems, and already the firm of C. R. Somerville are following their example.

The system consists of a pump capable of discharging 1,000 gallons of water per minute, and a system of pipes which are arranged so as to connect with all the different buildings of the McClary plant. The pump is operated by steam, which is supplied by the boiler and a pressure of 50 pounds per square inch is maintained night and day. In case of a fire this will operate the pumps at once and will force four 1-3-inch streams one hundred and fifty feet in the air. Yesterday the steam pressure was up to 120 pounds and the ease with which the large streams were forced over all parts of the plant satisfied the underwriters perfectly. With 120 pounds of steam a water pressure of 150 pounds was steadily maintained and when it is remembered that the average city pressure is about from 60 to 75 pounds it will easily be seen what a valuable aid the new system will be to the city firemen in case of a large conflagration. The pump is supplied from an immense concrete reservoir which the McClary people have constructed in the rear of their premises. This reservoir holds 100,000 gallons, and it is estimated this will supply the pumps while working at full speed for nearly an hour and a half. If it is required to be in operation longer the city water can be turned into the big reservoir.

Chief Clark says McClarys have now the best protected plant in London, and he mentioned several other large firms who had similar high-pressure systems put into their works, among others, the immense Deering concern in Hamilton, who not only have a modern high-pressure system, but maintain a paid fire department as well. The chief says they save money by doing it, too.
