

FRIDAY, NOVEMBER 30, 1894.

MORE BLUNDERING.

It appears as if the majority of the members of the city council belong to the class whom experience cannot teach. They ought to know by this time how unsafe it is to act in matters requiring professional skill and guidance without the aid of such skill and guidance.

POLITICAL PARONS.

There are no politics in the New Testament. Christianity deals with the individual and not with either Society or the State. It lays down broad principles of conduct which every man ought to observe in every relation of life, but it shows no preference for any form of government or for any particular line of policy.

PORT ARTHUR TAKEN.

We presume that the news which reached us yesterday of the taking of Port Arthur is true. It had been taken—by report—two or three times before, so yesterday's telegram will need to be confirmed before sceptical readers can be sure that the Chinese have lost that very important naval station.

A FAIR ESTIMATE.

Thomas B. Reed, some years ago Speaker of the House of Representatives, and admitted to be one of the ablest public men in the United States, in a speech which he made in Boston on Wednesday, gave his opinion of the significance of the late election in the following terms:

that at the last election had been caused by the inefficiency of the Democracy as a ruling party, and that the fact remains that the overwhelming victory we have had was a victory for education, for the firm faith of the American people.

TABLES AND CHAIRS.

DIRECTIONS FOR MAKING THESE AT HOME.

A Style That Affords Unlimited Possibilities to Amateur Furniture Makers. Results Gained With Good Taste and Moderate Finings.

The style in furniture known as Henri II. presents unlimited possibilities to the home furniture fabricator. The frame or foundation is usually made of some inferior and inexpensive wood and is then entirely clothed with a suitable textile fabric.

A HOME MADE TABLE.

ably china silk, silk tapestry, felt and serge, by the plush and cretonne will be found the most satisfactory.

A table should be from 24 to 29 inches high and not over 36 inches in length. 18 by 24 inches being a very convenient size. Let the top project two or three inches all around and be seven-eighths of an inch in thickness.

There are many old fashions that may be given a new lease of usefulness by fixing up in the manner here described or by painting or bronzing the legs and covering the top and frame with some pretty, bright looking textile.

Very pretty odd chairs can be fashioned in like manner, silk plush being the best material with which to cover them. This may be plain or embroidered.

A sewing case that meets the requirements of travelers is described by Modern Priscilla as follows:

It may be made of kid, chamois or cloth. It is cut a little wider than the spoils, which are held in place by a cord run through them and fastened by a loop to a button sewed to the edge of the case.

The Useful Chafing Dish. The aristocratic chafing dish bids fair to become a democratic utensil in tenement house reform.

A Good Vinegar Pickle. Pickles are prepared by first soaking in strong brine, then draining, drying, and pouring hot spiced vinegar over them.

Chocolate Faddings. Add 3 tablespoons of boiling water to 2 ounces of chocolate. Let it melt over the fire; then add a quart of cream milk. Half cream is none too rich. Sweeten to taste; add a little salt and half a teaspoonful of vanilla.

Analysis says that butter is the most nutritious article of diet and that bacon comes next.

IN A CORNER.

Take Care of the Corner, and the Room Will Take Care of Itself.

In the arrangement of a room corners are not sufficiently considered. Very few persons appreciate their capabilities. In a room of ordinary size and finish empty corners are especially ugly, while for handsomely furnished houses there are corner cabinets and other expensive devices to meet this very need.

The comparatively new fashion of a corner chair is both attractive and comfortable and few besides the gifted home maker with a slender purse know how very little in addition to brains is needed for its accomplishment.

It was not long before her inspiration came in the shape of a corner that proved a brilliant success. The seat itself was fitted by the carpenter like a bracket and then stuffed and tufted by the lady herself.

A chair only, especially if it be one of the prettiest, octagonal, rattan chairs, will make a corner attractive, and with the wickerwork enameled in cream and gold, and the seat and upright panels covered with silk in a light shade of old red it is appropriately fitted for its mission.

Convenient Sewing Case. A sewing case that meets the requirements of travelers is described by Modern Priscilla as follows:

It may be made of kid, chamois or cloth. It is cut a little wider than the spoils, which are held in place by a cord run through them and fastened by a loop to a button sewed to the edge of the case.

NEWS OF THE PROVINCE.

Trade With the Kootenay. Norwegian Settlers to Lower Fraser.

Singular Symptoms—Trail. Have a Smelter—New of the Mines.

(Special to the Colonist.)

VANCOUVER, Nov. 24.—A whole chant, recently returned from Kootenay, formed the COLONIST correspondent though people in Kootenay said were quiet "everyone seemed to be doing well. They said they were giving their trade to Washington States for the past three years, because of the Kootenay and Vancouver had sent no agents to them."

WESTMINSTER.

New Westminster, Nov. 24.—A guard, Norwegian emigrant advocate reports that he has about decided these several farms on the Lower Fraser the intending immigrants who will the province shortly. Before return to Minnesota he will carefully inspect Upper Fraser country.

NANAIMO.

NANAIMO, Nov. 24.—Wing Kee, sea merchant of Victoria, is in town on account of the case of the robbery in Chinatown. He is interested in store and will spare no effort to catch the thief.

KAMLOOPS.

(From the Sentinel.)

Mr. Chas. Hayward, provincial inspector for the province of British Columbia returned from an extended official tour of the Kootenay and Lower Fraser. Mr. P. Olsen came down last week the Homestake mine on Adam's lake had no difficulty in getting through with a wagon, so that a soon tunnel strikes the vein they will be hauled over. Two shifts of men are working night and day in the tunnel, which is about 150 feet.

A special meeting of the directors of the Inland Agricultural society was held last week, at which the protest against Mr. Wm. Fortune against Mr. P. W. Ham being awarded the Oppenheimer prize was taken up. The directors upheld the award of the judges. The grant for provincial government in aid of the fair received on Friday and on Saturday prizes were paid in full to those concerned.

A Chinese girl, known as Annie Lee, resided in (Chong Lee's house, died by on Monday night. She was taken suddenly ill, and upon Dr. Furrer being he was unable to find that the symptoms developed corresponded with those usually he knew of and as a result of died after a few hours' illness.

THE SLOAN TIME.

Kirkwood & McKinnon are reported to have offered \$20,000, \$2,000 down for the property on the Sloan creek. A hundred tons of ore from the Maiden are waiting shipment on the at Silvertown.

G. W. Hughes has acquired R. H. remaining interests in the Fisher & G. W. Hughes, the ownership of the thirty nos stands: G. W. Hughes, twelfth; Montgomery & Mann, nineteenth; Jap King, one twentieth, Byers, one twentieth.

The upper workings on the West are wet that they have had to be down until frost comes. The taking and sorting of ore has also been temporarily suspended on account of the fact there is no place to store the amount of ore that is ready for shipment, only work being carried on in driving the lower tunnel to tap the ledge. S. M. Watson and Clarence F. have returned from a visit to the R. The mine is looking well. In the slow the big surface showing they have feet of solid, heavy rock. This is feet below the surface and represents body of ore. On the new workings a ledge a tunnel has been run about feet, and the vein remains as strong the ore as high grade as on the surface.

WATER.

(From the Ledger.)

The main ledge has been struck tunnel on the Black Diamond and Phil properties at Ainsworth.

Genelle & Co. are getting things in for the commencement of their hauling runs in the Sloan creek. Hugh Mann is praying for sufficient to begin his big contract of hauling tons of ore from the Sloan Star to the way through the Forks.

Ward & Thompson, of Kalo, have exact to supply 10,000 bushels of ore monthly to the Piles Bay smelter. It is expected that the Columbia & any and the Nelson & Ford Shippers ways will have been linked together a son by Christmas.

C. Porter, ore buyer for the Selby & Co. of San Francisco, is at present the Sloan, having come in from Spokane, Thursday. He inquired the Cariboo creek discoveries, and as up procured numerous specimens of rock and pronounced them very good. He is taking them out for assay.

Thursday saw the termination of the contract between the Omaha and works and the Sloan Star people, of the ore stored at Three Forks for a year having been sent forward on day. The Kootenay and Lytton each own a big lead, 205,000 pounds in all, release value of \$14,750. The Alpha on Four Mile creek, has resumed its ore though in smaller quantities. The ore to Omaha. Three carloads of ore were brought in on Tuesday's train, it been reshipped from the steamer W. H. at Roanoke. The Le Roi mine, on creek, made its usual weekly shipment amounting to forty-four tons, to Helena, at a valuation of \$2,200. Gilliam forwarded from Kalo twenty and a half tons to Great Falls, the value \$2,500. It is only a question of a short time Trail creek will have a smelter. A present time it costs \$4 per ton to take ore from the mines to the railroad at Trail. The total cost of transportation (freight and treatment is \$16 per Bergstrom, an assayer from Butte, v
