

Bovinine

IS strictly a physician's preparation, and is introduced to the profession only. It is not a substitute for any medication, but a powerful auxiliary to it. It is most palatable and it can be given in any vehicle not incompatible with a preparation so rich in albumen. Given in small doses at first, it is readily retained by the most delicate or irritable stomach, and is of especial value in acute or chronic gastric disturbances, and intestinal disorders. It is an **IDEAL** invalid food, and is suited to all ages and all conditions. We do not wish to send samples and literature where they are not desired, but thousands of applications prove the desire of medical men to be frequently reminded of Bovinine.

A postal will bring you our scientific treatise giving clinical cases, and details of treatment for all cases.
