through not having this department of his business properly systemized.

MESSRS. FERRIS & Co.,

DEAR SIRS,—About two years ago I was in Philadelphia, and while there I bought one of your Steam Washers, and brought it home to my wife. She has been using it ever since, and is well pleased with it. It does all you claim for it, and every family should have one, for the saving on clothes every few months would more than pay for the machine.

ANOTHER CANCER

Successfully Removed by Dr. McCully.

This case is one of extraordinary interest because the victim, Mr. Gowland, of Markham, had eight times submitted to operations before we took the case. Between the medical fraternity and their coadjutor, the cancer plaster man, he had been cut, drawn and bled as much as usually falls to the lot of one person in this world. Again skill has triumphed, and we plant another land mark that the profession of this city and Ontario can neither gainsay nor pooh! pooh! Dr. Tye, of Chatham, President of the Ontario Medical Association, says of us: "It is most lamentable that men holding a license to practice an honourable profession degrade themselves to the lowest condition of misrepresentation and falsehood, preying on the superstition of the ignorant and fears of the feeble. They obtain money under false pretences, and are not amenable to punishment. We are ashamed of our company, and pray for a separation." —Canada Lancet, July Number. In the same number the following occurs:—"Dr. Henderson's notice of motion for the appointment of a Defence Union Committee is, we think, timely, and we trust that such steps may be taken at the next meeting as will give adequate defence to practitioners proceeded against for malpractice." The editor also proposes in the interests of the poor, dear, ignorant, suffering public to wipe out the patent medicine fiend, and abuses the papers that publish such advertisements. Now, this medical defence scheme is a fund contributed by medical men to defeat justice and save the craft from damages, but it is also proposed to make a man put up the costs before he enters a suit, and if poor of course choke him off. Reader, these are the demands of the medical profession as formulated in the Lancet. I have never published a case yet that I have cured that has not been given up by from three to twelve of their company." So profound is the stupidity of these men that they operated on an unfortunate woman in this city three times for piles, cut her nearly to pieces, and her trouble was to break in the end of the backbone. I removed that bone and the woman is recovering. These men demand more protection to hide their brutal carving. We ask the public in these two cases mentioned: Who was it obtained money under false pretences, the man who cured or the ignorance that bled the pocket and butchered the body? Our field is chronic disease in male or female, old or young, from any and every cause: also private diseases and deformities. Consultation free.
