TRADE REVIEW.

Office of CANADA LUMBERMAN, July 31, 1893. J

THE GENERAL SURVEY.

THE individual mention that we have given below of the United States and foreign lumber markets reflects quite fairly the condition of the lumber situation at home and abroad. We would not have it supposed that there is anything like a panic in lumber, for this is not the case, and such conditions would be in sudden contrast to the activity that existed in lumber, especially in Canada and the States, a few months ago. As everyone knows, monetary affairs in the States are in a somewhat unsettled state, and this influence has extended itself out to every branch of commerce, lumber not excepted. There has been no depreciation of values in lumber, for lumber stands as well to-day, almost, as three months ago; no circumstance has arisen to cause the opinion that the sanguine diagnosis of the lumber situation the early part of the season was over-estimated. Things are simply stagnant because, until the financial sky is cleared, people do not want to trade. A signal illustration is this of the place that money, using the term in its best economic sense, occupies in the financial fabric. The relationship of the Canadian and United States lumber markets to each other makes depressed conditions in the one country sympathetically felt in the other.

Summarizing local conditions in different parts of the Dominion, it may be said, that in Ontario duliness prevails; in Quebec, shipments are less than a month ago, lumber that is ready for shipment at Montreal is being held back because of dull trade abroad. New Brunswick, where considerable trade is four in New York, Boston and other American cities, is __ung the effects of the money stringency in the States. In British Columbia a fair local trade is doing, but quietness exists in export lines.

FOREIGN.

In their wood circular of current date Farnworth & Jardine, of Liverpool, Eng., say: "The arrivals from British North America during the past month have been 26 vessels, 20,530 tons against 16 vessels, 16,261 tons during the corresponding month last year, and the average tonnage to this date from all places during the years 1891, 1892 and 1893 have been 135,095, 120,989 and 107,217 tons respectively." Of current business they ay, "Throughout the month business has been quiet and the demand inactive, values remain stationary and stocks are sufficient." Our advices from London, and other sources touching trade in the United Kingdom are along similar lines. Neither in South America nor from Australia does very cheerful news of the situation come.

UNITED STATES.

The lumber trade of the United States is meeting with not a few commercial vicissitudes as a result of the continued monetary depression. Quite a few failures are reported, and it is feared that others are yet to come, if there is not a speedy easing of money matters. The effect of the depression on immediate business is to make everything very quiet, the most solid and conservative houses not caring to push trade.

BUFFALO AND TONAWANDA, N.Y.

TONAWANDA, N.Y., July 31.—The labor troubles between lumber shovers and employers, which have dragged along for some months, are now happily ended, and have resulted in a complete cave in of the men. Their loss has been heavy, but it is to be hoped the experience will be profitable. Business is no ways active, the tendency being towards quietness.

SAGINAW, MICH.

SAGINAW, Mich., July 31.—The situation is a wonderful change from that of the opening of the season. Then buyers were full of anxiety to buy, and sellers
