Frisco insiders say road is earning at rate of 10 per cent. on common stock. Erle bond rumor definitely contradicted. Philadelphia bull pool reported operating in Chesapeake & Ohio.

Washington operators expect reduction of Cuban sugar tarift.

Public opinion in Minnesota is said to be becoming markedly less hostile to the Northern Securities Company, and the opinion is said to be gaining ground that Governor Van Sant's opposition to the company is inspired solely with a view to making hinself solid for a renomination. Joseph says: Manhattan is well bought, and it is still insisted that company will make important Vanderbilt connections. Bank statement to-morrow will be good, the best, in fact, in months. Sugar will work higher; it is a buy on every little dip. New bull pool has been formed in the Steels. Mr. Morgan insists that the coalers are the stocks to bull for very substantial results.

It is said that a circular dealing with Pennsylvania is being prepared by a prominent bull interest, and that on the showing to be made therein the stock is likely to be somewhat prominent in the next upward movement of the market. Particular stress will be laid on the company's investments, and the showing to be made of their value and appreciation since the time they were made will, it is claimed, be quite remarkable.

The professional character of the market, says The Tribune, is such that irregular price movements are likely for the immediate future, with the tendency towards a lower level until the existing uncertainties are more fully discounted. Discussing the general declines of stocks recently, The Tribune says: Since the opening of the year losses have been 8 points in Missouri Pacific, 6½ in Atchison, 6 in Rock Island, 5 in Erie, 5½ in Reading, 7 in Baltimore & Ohio, 4½ in Louisville & Nashville. It is time for caution and not for hap-hazard purchases, a fact exemplified in recent announcements of new capital issues whi

From the large number of enquiries we have already received and the very large amount of business done in our No. 1 combination, it is evident that our new "combination system" of investing in South African stocks is bound to fill a long felt want among the investing public. In brief, mining in South Africa is on such a sound basis and prices so comparatively low now, owing to the war, that large profits on present values are practically

certain. We suggest the combination because some properties are certain to appreciate more than others, consequently leaving a larger profit on the whole.

The Kaffir (South African) market is now receiving the support of the investors of Great Britain, Germany and France to the exclusion of other classes of investment. Some investors who deal extensively on the New York market, when spoken to in reference to the South African market in London, say "Oh, but London is too far away!" when, as a matter of fact, there is little difference and a cable can reach London almost as quickly as a telegram can reach New York. Owing to the great demand for our No. 1 Combination, selected from the cheaper stocks, we have

arranged a number of others in higher-priced shares, any one of which will, we believe, prove profitable, and which we give as under. In sending your
