INTERESTS OF COUNTRY MORE THAN PARTY'S

Extracts From Recent Address of
Hon. Chas. Murphy—Canada's
Water Power

The following is an extract from the address of Hon. Charles Murphy at the non-partisan banquet in his honor at Ottawa:

"This occasion reminds me that it is not only in Ottawa that party feeling can be laid aside in the interest of that spirit of true Canadianism which is growing stronger every day. During my visit to the west last summer I attended at least twenty meetings where, as this is, non-sectarian and non-political in character, and I am free to admit that I came away from every one of them with my own sympathies broadened and uplifted, with a better opinion of my fellow-Canadians, and with a firmer belief than I ever before entertained of the splendid destiny that Providence has in store for this dominion.

"There is another effect that is produced by such gatherings as this. The public mind is made to realize that the interests of country transcend those of any party, and that he serves his party best who best serves his country.

"Mr. Chairman, I regard it as a rare privilege to be allowed to serve Canada. Her history inspires devotion to high ideals; her present progress is an incentive to great enterprises; and her future not only engages the attention of her own citizens, but is as a magnet attracting the people of other lands.

Canada's Water Power

"A few months ago I was one of the first group of travelers who went in over the new government road running from Field in British Columbia through the Yoho Valley to the foot of Takakkaw Falls. The cataract is nearly six times higher than Niagara, and as I watched the foaming waters falling from a height of 14,000 feet, I thought of Sir Wilfrid Laurier's prediction that just as the 19th century had been the century of the United States, so would the 20th century be Canada's century (loud cheers), and the spectacle that met my eyes suggested the time when countless water powers now running to waste, would be harnessed to thousands of manufacturing projects, and Canada, with a population of twenty to twenty-five millions, would be not only the industrial hive of this continent but the dominant partner in the British Empire.

"As you travel over the dominion the thoughts that press in upon you from every side, and for which you can scarce find lodgment, so rapid is the picture of development that unfolds before your view, have been happily expressed by one of Canada's absent sons in those recently published lines:

Out from the mists of Humanity's sorrows;

Over the heralds of Destiny stand;

Rises the star of a world's tomorrow

Over the Twentieth Century

Wind-swept of Heaven are the sentinel mountains;

Sun-kissed the prairies that melt into space;

Rivers and forest-girt lakes are the fountains

Brimming with pulp-juice for Industry's race.

Soth of a million suns! Seed-time and Reaping

House thee from sleep with a Midas-tipped wand;

World-weary argonauts westward are keeping

TWO SUICIDES BY POISON IN ONTARIO

Brantford, Ont., Nov. 10.—William Collins, aged 59 years, was found dead at his home here as a result of his having taken two poisons, from a bottle found close at hand. He had been suffering from chronic indigestion and became despondent.

Caledonia, Ont., Nov. 10.—Samuel Smith, an Englishman, who had been working on a farm near this place since June last, died here at 2:30 this evening from an overdose of morphine. Medical attendance was summoned when his condition was first suspected, but he was past help. No motive is known for his act, though he had made another attempt about two weeks ago. He was 35 years old and unmarried. He had been in Canada about five years.

The Fight Is On

Every moment of your life, when you are at home or abroad, awake or asleep—
Between the poison germs that are in air, food and water, — no thought in fact, and the millions of your invisible friends the little soldier corpuscles in your blood. If these little soldiers are kept strong and healthy by taking Food's Parasapilla, you need have no fear of disease. Begin using it at once if you are at all under the weather, or have troubles of the blood, stomach, liver or kidneys. Get it of your druggist.

Tryst in the Twentieth Century Land. Last of the Earth's virgin hearts to surrender.

Queen of an Empire that follows the sun:
Strong me are wooing thee—loyal and tender
Millions of patriots palanqued as one.
Dreams of the Ages in the final fruition:
Freemen rejoice as thy glories expand;
Beacon-lights burning, hold true to thy mission!
Canada! Twentieth Century Land.

ANOTHER SHOOTING

AFFRAY ON THE G. T. P.

Another shooting affair is reported among Italians working on the G. T. P., at Odette Stream, about eighteen miles from Perth. Two men, whose names could not be ascertained, decided to quit work and were paid off about four months' wages. After quarrelling, one of them pulled a revolver and shot at his companion. Four shots were fired, two of which took effect, the one in the back and the other in the arm. After seeing his companion fall, the assailant searched his victim and took his money. Later the Italian who did the shooting, called at the home of Daniel Wright and enquired about the train. The wounded man managed to walk to Wright's house, an hour later, and told what had happened. A posse was organized, but up to a late hour last night, no trace of the culprit had been found.

JOHN GETS BACK

She stood there and glared at him.

"And you mean to stand there and ask me to press your trousers?" she demanded with all the sternness she could muster.

"Why, certainly, my dear," responded Mr. Stubb, affably, "in that asking much."

"Well, I should say it is, John Henry Stubb. I'd have you know that when you married me you did not marry a flatterer."

"That evening his turn came."

"John, dear," chirped Mrs. Stubb just after supper, "I wish you would do me a favor before you go. Button my waist up in the back, that's a good man."

But Mr. Stubb merely puffed cigar and chuckled softly.

"Nay! Nay! Maria, I would have you know when you accepted me you did not say 'Yes' to a buttonhook."

And picking up his walking stick, he walked out.

"BALLOT AND WORKING WOMEN."

Mrs. Frederick Nathan, president of the Consumers' League of New York city, gave the second lecture in the course recently instituted in Columbia University by the Equal Franchise League. Mrs. Nathan's subject was "The Ballot and the Working Woman."

She appeared to be of the opinion that working women as a class would vote more intelligently than many of those who say much about the danger of the ignorant vote. "The idea of the ignorant vote varies with the point of view," declared Mrs. Nathan. "I once heard of a working girl discussing the suffrage question and she, too, was afraid of the ignorant vote. She looked for it, however, in a different quarter from that from which many people expect it to come. She said she was sure the working woman would vote intelligently, but she wasn't at all sure about ignorant fashionable women."
