The following particulars in reference to the storm are furnished by D. L. Hutchinson of the Weather Bureau. With the beginning of the snow fall the barometer began to fall and yesterday afternoon went down rapidly. About one o'clock this morning it ceased falling and began gradually to rise again. The temperature during the storm averaged from 17 to 20 degrees above. The wind first was from the northeast and blew at a rate of from 28 to 80 miles an hour. Late in the night it shifted that another steamer is necessary. The Majestic is able for the work and is a less expensive boat than a new and larger one would be. But if satisfactory arrangements can be reached it is quite possible that the Star Line will purchase another steamer.

Ald. Millidge said today that a one nch service pipe would be run from the high pressure system to connect with these houses where the scarcity is felt. Leinster street, south of Pitt street, is on the summit of the low pressure service and while there is an abundance of water there is not pressure enough. Ald. Millidge estimates that there are now only tweive or thirteen families in the city who want more water and he the city who want more water and he thinks this is very creditable. It would

whinks this is very creditable. It would in his opinion, be unwise to make expensive changes in the present system for the purpose of supplying such a small number of people.

Just now water is being allowed to run continually in many houses, and the supply in the reservoir is low, but in the spring, when the snow melts, Ald. Millidge houses the present difficulties. Millidge hopes the present difficulties will be overcome.

FATHER DISOWNS HER. Newark Girl, in Court, Declares She Will Die Rather Than Abandon Her

NEW YORK, Feb. 15.—Catherine Arrant, sixteen years old, has refused to give up her belief in the Catholic faith or to remain away from St. John's

Church, in Newark, where she expects to take her first communion tomorrow morning, and as a result her father has disowned her. To the Editor of the Star:

Sir,—Although a large amount of money has been spent on what was supposed to be a modern fire-alarm system, it seems that in the majority of cases since its installment, great difficulty has been experienced in sending in alarms. Are we to understand that it takes a telephone system as well as a fire-alarm system in order that an alarm of fire may be sent in?

Yesterday's exhibition when box 28 morning, and as a result her father has disowned her.

Three years ago the girl left her father's house, she says, because she could not get along with her stepmother. On Thursday John Arrant, her father has disowned her.
