Number of men trained (Note 2).....		19,000		32,000		46,000*	

NOTE 1.—Authority was given by Parliament in 1905 to increase the establishment of the permanent corps up to a maximum of 5,000 men, as might be found necessary in order to provide for the garrisons of Halifax and Esquimaux, and to allow for organizing additional units for instructional purposes to keep pace with the growth of the Active Militia. Up to the present time only a total establishment of 3,311 all ranks has been authorized.

NOTE 2.—The permanent corps have been included in each case in the number of men trained.

NOTE 3.—All units of the Militia provided for in the authorization are establishments for the financial year have been shown in each case. In each of the two earlier years, the formation of some units, though provided for, was not carried out in that year, and the same thing may possibly occur in the present year.

NOTE 4.—Of the difference in numbers between the establishments of the permanent force in 1905-6 and 1906-7, the assumption of responsibility for the defence of Halifax and Esquimaux accounts for 565 artillery, 150 engineers, 745 infantry and 150 departmental corps; total, 1,510.
