RADWAY'S READY RELIEF THE TERROR OF THE HOUR-DEATH AMONG THE CHILDREN - WHY EPIDEMICS ARE TERRIBLE !- THE TRUE CURE, BY SIMPLE MEANS. Whenever any disease or symptoms appear as an Epidemic, and is more than ordinary fatal, and less manageable by medical men, and

yields less readily to the remedial agents applied-it is pronounced "a pestilence," " a fatal malady,"" a visitation," when in reality, if the proper remedial agents were applied, and judicious treatment pursued, it would be just as manageable, and yield as readily as any ordinary ailment. No maiter what may be the character of the disease or its symptoms-if the doctors with their remedies fail in arresting it, or curing those seized, it is at once declaned incurable, or a pestilence, and doctors congratulate each other on the incurability of the disease, and maintain that its frightful ravages are outside the power of medical skill or science. Not one of these diseases called pestilence - whether MALIGNANT SCARLET S FUNDS FEVER, that is said to be prevailing fatally among the children of the Lower Province, or Diptheria, Influenza, Pneumonia, Congestion of the Lungs, Lung Fever, Small Pox, Measles, and all forms of malignant Fevers-where they prevail in a more malignant and violent type than ordinarily-but if the proper treatment is pursued, and the right remedies used, will be as easily managed as any other ailment; the same with Asiatic Cholera, Yellow Fever, Typhoid Fever, etc.

TREATMENT AND CURE.

In Maliguant Scarlet Fever, Diphtheria, Putrid Sore Throat, Influenza-give at once Radway's Ready Relief, diluted with water-20 drops to a teaspoonful of Relief in a tumbler' of water, and give of this from half a teaspoonful to a table-spoonful every two or three hours. Next-sponge the body over with Ready Relief (if an infant, dilute the Ready Relief in water) ; continue this sponging for 10 or 15 minutes, until the skin becomes reddened; also wear a piece of flannel saturated with Ready Relief (diluted with water if the skin is tender), around the throat and over the chest; also gargle the throat with Ready Relief diluted with water, one teaspoonful to a tumbler of water; or if convenient, and there is inflammation, licers, or redness in the throat, make a swab, and apply the Ready Relief by this means to the parts of the throat inflamed.

DOSE.

On some persons 2 pills will act more freely than 4 on others : and often the same person will find that 4 pills at one time will be less active then 2 at others this depends on the condition of the system. The first dose will determine the quantity required : an ordinary dose for an adult in these malignant fevers is 4 to 6 pills every six hours, to be increased or diminished according to the judgment of the patient.

Infants under 2 years, may take, to commence with, half a pill, to be increased if necessary, to one pill.

Children from 2 to 5 years may take one pill to one and a half, and if not sufficient, 2 pills or

more may be necessary. Where inflammation exists, grind one, two, or more, and for adults six pills to a powder; if within one hour relief does not follow, repeat the dose, given in this way, and the desired result will ensue in from 30 minutes to 2 hours.

In severe attacks of Gastritis, Bilious Colic and Inflammation of the Bowels, 6 of Radway's Pills, ground to a powder, have secured results which Croton Oil and other powerful agents nave failed to produce.

Let those afflicted with disease get Dr. Radway's Almanac for 1869-can be had free of charge by applying to any druggist or general storekeeper; if not, send a stamp to pay postage, to Dr. John Radway & Co., 139 St. Paul Street, Montreal. or 87 Maiden Lane, New York.
