

Market the Milk
Raise your calves and get the bigger money to which you are entitled. But do not feed the calf whole milk, with butter fat worth \$600 a ton.

RAISE YOUR CALVES
WITH **BLATCHFORD'S CALF MEAL**

Blatchford's Calf Meal
The Recognized Milk Equal
You get 100 gallons of rich milk feed from 100 pounds of Blatchford's Calf Meal, and it costs you only one-fourth as much. It will make your calf grow fast and well. Blatchford's Calf Meal is composed of the elements the young calf needs in the most trying period of its life; is thoroughly steam cooked—prevents bowel troubles and other ills due to improper milk substitutes. Blatchford's Pig Meal insures quick, sturdy growth of young pigs at weaning time, without setback or falling off.

Write us for our Free Book on "How to Raise Calves Cheaply and Successfully Without Milk." Steele, Briggs Seed Co. Dept. 68 Toronto, Ont.

L. G. Beard, Niagara Falls, N.Y., writes: "I can say Blatchford's Calf Meal will pay anyone 100 Pct. that has calves to raise."

SHORTHORNS

Five high-class bulls, from 10 to 15 months, two sired by Real Sultan, others just as good. Am pricing them low, as it is getting late in the season. A few heifers and young cows to offer, some milking families. Freight paid.

Stewart M. Graham, Lindsay, Ont.

For Sale—Five Shorthorn Bulls, 12 to 18 months old, from good milking dams and 3 roans; prices right. Also one good roan bull, 8 mos. old, a Campbell Rosebud, a right good one. Write us, or better, come and see.

JOHN SENN & Son Caledonia, R. R. 2, Caledonia Stn., G.T.R.

SHORTHORNS

A few choice bull calves for sale. Would price a few females. Inspection solicited.

J. T. GIBSON, Denfield, Ont.

Burnfoot Stock Farm, Caledonia, Ont.
Breeder of heavy milking dual purpose Shorthorns. We offer now a handsome roan bull, calved Aug. 13, 1915, out of Jean's Lassie, the champion 2-year-old in the R.O.P., and sire as good. S.A. Moore, Prop., Caledonia, Ont.

Shorthorns—"Pail Fillers"—Our Short-
horns are bred and developed for big milk production. If you want a stock bull bred that way, we have several; also Clyde, stallion rising 3, won 2nd at Guelph the other day in a big class. P. Christie & Son, Manchester, Ont.

Shorthorns—bulls, females, reds, roans, size, quality. Breeding milkers over 40 years. Cows milking 60 lbs. a day. Big, fleshy calves that nurse calves right. Prices easy, write: THOMAS GRAHAM, R.R. 3, Port Perry, Ont.

Shorthorns and Swine—Have some choice young bulls for sale; also cows and heifers of show material, some with calves at foot. Also choice Yorkshire sows.

ANDREW GROFF, R.R. No. 1, ELORA, ONT.

Northlynd R.O.P. Shorthorns and Jerseys
Present offering, one shorthorn bull old enough for service, whose dam, his dam's full sister and his granddam in six yearly test's made an average of over 8,500 lbs. milk, testing over 4%, in an average of 329 days. G. A. Jackson, Downsview, Ont.

How One Horse Was Broken

An amusing illustration of the power of determined patience is related by Captain Kerr, of the British Cavalry. In his own words it is as follows:

"I may instance the treatment by which a well-known Yorkshire breeder and breaker—one who always broke in his own colts—cured a stubborn and by no means uncommon case of mulishness. Riding a colt one day, about noon, the colt rested—i.e., obstinately refused to turn out of the road that led to his stables. He reared, whipped round, kicked, plunged, stuck his toes firmly in the ground, backed into the ditch, and otherwise behaved himself unseemly.

"Many a man would have administered severe punishment, and have endeavored to exorcise the demon of contrariness by free application of the Newmarket flogger and the Latchfords. Our friend's creed was the suavitudo in modo, spiced with patient determination. After exhausting every method of kindness and encouragement he determined to 'sit it out,' so, bringing the disobedient youngster back to the point of disputed departure he halted him there, sitting in his saddle as immovable as one of the mounted sentries at the Horse Guards, or the Duke of Wellington at Hyde Park Corner.

Still Obstinate.

"At the end of an hour's anchorage a fresh essay to make the pig-headed colt go in the way it should go resulted in a renewed exhibition of rearing. Observing a lad passing at the time, the determined tyke ordered him to go to his wife, and tell her to send his dinner to the cross roads, for there he meant to remain out all night and the day following if need be. The repast duly arrived, and was despatched on the animal's back. Another effort was but a fresh failure, so the statu- esque, weary wait was resumed, and the veteran breaker sat again for hours immovable. Here was the living exemplification of Patience on a monument.

"With the setting sun came the horseman's supper, still not a move, and the sturdy yeoman prepared to make a night of it. In due course his top-coat and a stiffly mixed 'meet cap' arrived. Whether or not the colt divined the meaning of these campaigning arrangements deponent sayeth not; anyhow, his mater had hardly donned the one and swallowed the other than the quadruped, with one long sigh, one that nearly carried the girths away, all his obstinacy evaporated, and, thoroughly defeated, relieved himself from his post, and quietly walked down the road in the direction he had so long protested so firmly against. The lesson was a permanent one; it took some eight hours in the teaching, but lasted a lifetime—he never 'struck up' again."

If it be objected that a vicious animal cannot be so handled, suffice it to say that impatience and harshness certainly never controlled or broke one.—O. A. C. Review.

Planting Weak Seed Corn.

Although seed corn has tested fairly well at the Ottawa Laboratory, corn growers whose seed has not been tested would do well to take special care this season that their seed is of strong vitality. Owing to unfavorable ripening and harvest weather, some of last year's seed corn crop may be low in both percentage and vigor of germination. This seed should not be planted until the soil is warm and the weather at its best to encourage the growth of the young corn plant. The rate of seeding may be increased, but no amount of fairly weak seed is likely to give a good stand of plants unless the conditions of growth are most favorable.

Sweepings from threshing floors and granaries are frequently dumped in the barnyard, and later hauled to the land with the manure. The sweepings from the floor and its crevices are usually foul with weed seeds. Unless the yard scrapings or manure is thoroughly rotted, most of the weed seeds will retain their vitality and produce a vigorous crop of weeds. Burning the sweepings would be a much safer method. If they contain grain, boiling will make them a safe feed for poultry or live stock.

Be sure of good silage, it pays best

Next Winter When the Ground Is Covered with Snow

YOU will appreciate having an Ideal Green Feed Silo full of rich, juicy silage. It will make your cows produce a larger flow of milk right at the time when dairy products are bringing the best price. Silage increases milk flow 25 per cent., and reduces feeding cost from 15 to 20 per cent. Besides, silage is so easy for you to feed. It is compactly stored under cover. No need of hauling feed in bad weather or handling snow covered fodder.

IDEAL GREEN FEED SILO

The name Ideal Green Feed Silo is worth a lot of money to us because we have made it stand for a definite reliable measure of quality in the minds of thousands of Canadian farmers. They know this silo preserves the silage perfectly and gives the longest service. A Company cannot afford to put its trade mark on an inferior article any more than you can afford to put your corn crop in an inferior silo.

A trade mark to be of any value must be the identifying mark of superior quality, just as silage to be worth anything must be good silage. The man who sells a nameless, unbranded article has nothing at stake; he is not building up a reputation and using every effort possible to sustain his good name.

You have always noticed that when an article is given a name—a trade mark—by its maker, and advertised, every effort is made to insure reliable quality and make it a safe article to buy. You take no chances when you buy an Ideal Green Feed Silo. You have positive assurance that when you open up your silo you will find the silage well preserved, that you will get longer service from this silo than from any of the so-called "cheap" silos.

Write to-day for our large illustrated catalogue which shows you every detail of this silo and explains just why you get more in it for your money than in any other.
