

**La Dow's Patent Float Spring Tooth Harrow.**

This machine has been thoroughly tested, and found superior to any other Float Harrow, for the following

**Important Reasons:**

Its frame will not break, split, wear out, become rickety or load down with wet earth. Its frame is made of flat steel, and the sharp edges of its beam break and shave down sods and clods.

Its teeth will not trail in each other's tracks, in any kind of work.

Its teeth can be instantly set to work at any practical depth.

Its teeth can be instantly raised to clear rubbish. Its teeth can be instantly raised and held up by the levers above the ground, so that it can be driven no its runners from one field to another.

It is the only Float Spring Tooth Harrow which has these improvements. Write for circulars descriptive of this and other harrows.

GEO. GILLIES, Sole Manufacturer for the Dominion. GANANOQUE, ONT. 255-b

**PULVERIZING HARROW, CLOD**

Crusher and Leveler.

AGENTS WANTED.

Best Selling Tool on Earth.
