PREPARE FOR SEEDING! **NOW** is the time to secure **NEW** and **CHOICE WINTER WHEATS** by obtaining new subscribers for the **FARMER'S ADVOCATE**, the foremost Agricultural Paper in America for the practical farmer. For the benefit of our readers we have secured a quantity of two new and most successful Winter Wheats.

Dawson's Golden Chaff and Early White Leader.

DAWSON'S GOLDEN CHAFF has topped a list of 42 varieties grown at the Guelph Experiment Station for the past three years, yielding 18 bushels per acre more than the average of 80 varieties tested. In co-operative experiments by the Experimental Union all over Ontario in 1893 and 1894, it gave the **LARGEST YIELD**, and was **MOST POPULAR**, out of eleven varieties tested, thus proving its general adaptability. Average yield per acre at Guelph, 51 bushels; over Ontario, 35. It is a bald wheat, white, golden straw of medium length.

EARLY WHITE LEADER.—A newer and most promising sort. At the Guelph Experiment Station it gave the largest yield (43.6 bushels per acre) out of eight varieties grown for the first time in 1893; average yield on 81 farms throughout Ontario, about 30 bushels. (The general average of all winter wheat throughout Ontario, as reported by the Bureau of Industries, was less than 20 bushels.) Early White Leader has again done well this year. It has a long straw, stands well, long bald heads, white chaff, and has beautiful white grain.

How to Start Growing these Heavy Yielding New Varieties.

We will give 20 lbs. of either variety for the name of one (1) new subscriber to the **FARMER'S ADVOCATE** accompanied by \$1 cash; or, 50 lbs. for two (2) new subscribers and \$2; each additional new subscriber, 25 lbs. more.

First-class cotton bags in all cases 20 cents each extra. Wheat sent by Express or Freight as desired, F. O. B.
