26 fillies averaged \$318.	

THE PARADISE OF BEASTS.

A poor old horse, hitched to a coupe was sleeping a rainy night before the door of a low restaurant in which women and young fellows were laughing.

And the poor scraggy plug, with his dejected head, his weak legs, a sorry sight, awaited the pleasure of these night-birds to get back to his miserable stinking stable.

Half asleep, the horse heard the coarse jests of these men and women. He had been for a long time accustomed to them. Even his feeble brain taught him that there is no difference between the squeaking cry of a wheel and the cry of a degraded woman.

And this night he dreamed vaguely that he was again a little colt on a lawn where he used to gambol in the green grass with his mother who fed him.

All at once he fell stiff, dead, on the sticky pavement.

He came to the door of Paradise. A learned man who was waiting for St. Peter to open the door, said to the horse: "What are you doing here? You have no right to enter Paradise. I have the right because I was born of a woman."

And the poor plug answered, timidly: "My mother was a gentle mare. She died old, abused; and I came to find whether she is here."

Then the door opened, and lo! the Paradise of animals.

And the old horse knew his mother, who recognized him.

Fruit Farm Windsor Supply Co., Windsor, Ont.

Adjoining the city of New Westminster, B. C.

Six-and-one-half acres of highly cultivated land. 650 bearing Fruit Trees; large modern dwelling; stable; chicken houses; and all necessary outbuildings. Gravity system of water supply. 500 feet of frontage on Fraser River, which is valuable for mill sites. Train line will run through the property. Price \$15,000. Terms, half cash, balance one and two years at 8%.

The "Capital" Is \$40.00 A Year Better Than Other Separators

TESTS made by dairying experts show that the average cream separator leaves 0.054 per cent. of butter fat in the skim milk. That is the average loss you can expect from the average machine.

With butter at 25 cents a pound, that loses you 6.7 cents on every 500 pounds of milk you run through the average machine.

But the Capital Separator skims to a mere trace; and its average loss is only 0.01 per cent.—pretty nearly six times as clear as the average machine skims.

On every 500 pounds of milk that saving amounts to 5½ cents (\$0.0547 exactly). Figure it out for yourself and see.

Now the Capital machine, although its bowl is the lightest, and its gears the easiest-turning, easily handles 500 pounds of milk an hour. Run it two hours a day, and it will

get you practically Eleven Cents a Day More Butter-Money than the Average Machine.

If that isn't \$40.15 cents a year, what is it? If you don't think that is possible, or if the Average Machine's man says it isn't, write to me and I will prove it to you.

Do You See This?

The average cream separator loses .054% butter fat.

The Capital loses only .01%.

Therefore the average machine loses 4.3 oz. butter in every 500 lbs. whole milk it handles.

And the Capital loses only 8/10ths of an ounce.

With butter at 25 cents a pound, Capital's gain is the difference between \$0.0124 and \$0.0671, or practically 5½ cents for every hour the Capital runs against the average machine of similar capacity (500 lbs. an hour).

The reason for this big difference is the Capital Wing-Cylinder,—the 7,000-revolutions-a-minute Skimming Device that whirls the fat out of the milk almost drop by drop.

This device is the one that handles the cream and the milk only once,—doesn't mix the cream again and again with the skim and lose a little fat with each needless mixing, as the hollow-bowl machines have to do.

And the Capital machine, with its 3½-pound bowl (the Lightest Bowl there is), and

its perfected, simplified, easy-running, gearing, doesn't make you work like a horse to keep it running uniformly fast enough, as you have to do with the Average Machine and its old-fashioned gears.

Nor is there any back-breaking lifting, sloppy, mussy, high-up milk tank about the Capital machine. Its milk-tank stands on the floor,—the Only Really Low-Down Tank there is. Look at the picture of it and see how easy it is to fill.

I will sell you a Capital on terms so easy the machine will buy itself before you realise it.

Tell me how many cows you keep, and what their yield is, and I will tell you just how quick a Capital will pay for itself on your farm—and what it will actually earn you, in money.

I will prove every word I say if you will write and ask me what you want to know about the Right Way to get More Money out of Cows.
