Patience With Ca's

The cat is a patient creature. She will stand abuse for some time before she will show her displeasure. If you have a nice, little, even-tempered cat and wish to spoil her, place her in the care one who manifests impatience at the slightest thing which happens or some time when nothing happens. A person who is naturally impatient does not have to have a cause before show-ing it. He goes about with a grouch and when he speaks pleasantly it is a surprise to those about him. Impatsurprise to those about him. Impa ience is a characteristic which may so be taught to an animal. If a dozen times a day a cat is spoken to impat-fently then the cat becomes nervous and irritated so that she is in a condition "bemper" at any and all times, and it is not necessary to give her provocaany more than it is necessary to give the impatient person a cause. It be-comes second nature to be ugly. It is not always necessary that the

impatience be outwardly manifested; one may restrain the manifestations of temper but if it is inside, boiling, the cat is wise an dknows it. Cultivate a temperate spirit such as is manifested by a carefully nutured and well-bred Does the cat scratch you with Slapping her will not cur crouble. Teach her that yo not cure her of this trouble. Teach her that you are her friend. If she has been in the are her friend. It she has been in the hands of some one who has abused her, and impatience is always abouse, let her know that you are different in your make-up and she does not need to scratch you to protect herself from harm. If some one has owned her that has constantly tickled her feet or snapped their fingers in her face and in othways insulted her intelligence, teach her that in you she will find some one who does none of these tricks. You may take the meanest cat in the world and as soon as you have fully won her confidence you will have one that makes you no trouble by her ugly manner. She mean to strangers for she has y been taught by them that e bitter enemies. It is always probably been taught by them that they are bitter enemies. It is always a pity that kittens are not started right and trained by temperate people to have an amiable manner.—By C. H. Jones, editor Weekly Cat News.

THE RIDDLE OF LIFE. By the "riddle of life" not every-

body will understand the same thing. however, desire to know how life originates and what death is, since our ethics must be influenced to a large extent through the answer to this quee ere not yet able to give answer to the question as to how life originated on the earth. We know that every living being is able to transform food-stuffs into living matter; and we also know that not only the commal body can be produced artificially, but that chomical reactions which take place in aving organisms can also be repeated at the same rate and tempera ture in the laboratory. The gap in our knowledge which we feel most keenly is the fact that the chemical character of the catalyzers (the enzymes or ferments) is still unknown. Nothing indicates, however, at present that the armicial production of living matter is beyond the possibilities of science. Dr. Jacques Leob in The Popular Science

WOMEN SMOKERS.

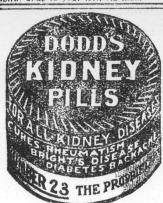

(Brantford Expositor.)

Smoking by women in public has become sufficiently common in New York City to lead the Board of Aldermen to publicty discuss measures looking to the brownibition of smoking by women. The legal department has been officially asked for an opinion as to whether or not there is a law on the statute books that may not be applied. The fact is that the only effective weapon against the smoking of women is public opinion. Why should the legal department interfero with the women any more than with this sment. (Brantford Expositor.)

WAR OVER TRIFLES.

Troubles Caused by a Teapot, Bucket and a Glass of Water.

The history of warfare contains numer ous examples of conflicts that have origi nated through trilling causes, says the London Globe For instance, Turkey in London Globe For Instance, ruracy inthe past suitered greatly in a war with
veince. When the venedian Amoussanor
to rentry a treaty by swearing in the
hostem fashion upon his bears and the
beard of the Prophet he declined, because
as he said, "the Venetians wear no
beards."

This remark was too much for the Turk
who returned apartly. "Nor do monkeys!"

is he said, "the Venetians wear no ben'ds" remark was too much for the Turk who retoried angrily, "Nor do monkeys!"—an exclamation which caused the other to tear up the treaty and reture from the conference. The sequel was a sanguinary conflict in which fell 30,000 Christians and four times that number of Turks.

But the Turks were not the only ones to use blows instead of argumenton the slightest provocation. The Emperors of Chins have ever been famous in this direction, the record instance being a war-250 years ago, which began through the smashing of a teapot. This indispensable household article was looked upon by its owner, a high dignitary of the court, as a priceless treasure, and consequently it accompanied the great man on his journeys.

It so happened that when he was travelling through the lawless provinces northwest of China some of the retinue were intercepted by a band of robbers, who found the teapot among the baggag and indignantly ling it to the ground and broke it. The matter was reported to the Emperor, who was so indignant at his favorite's loss that he sent out a punitive force and a long war began which resulted in the death of 500,000 men. A conflict over a teapot, even a valuable one, seems almost out of the range of possibility until one recalls that a bucket was once the innocent cause of a terrible war. Nine hundred years ago a party of soldiers of Modena stole a bucket, apparently as a practical joke, from a public well in Bologna, and refused to restore it. Fights thereupon took place between the soldierst of the rival States and started a war which devented a large part of Europe.

The cash value of that bucket was only a few shillings, but wars have often been wared concerning things that represented little from a monetary point of view. An excellent illustration is afforded by Algeria, which came into the possession of France through a disagreement over a perty debt. The Bey of Algers demanded Immediate payment through the French Consul, who asked for time to pay, and in reply wa

French Consul, who asked for time to pay, and in reply was beaten and thrown into prison.

A couple of days later a conflict was begun that continued for twenty years, during which time more than half a million lives were sacrificed. Such a calamity was surely unnecessary for such a pairty cause, and the same remark is equally applicable to other wars.

In 1879 the Transvaal was declared a Crown, Colony, and the satarles of officials, both Dutch and British, were cut down. Among the number so treated was a certain Paul Kruger, whose salary was reduced by £50 pounds per annum. The loss of the money annoyed to Dutchman, who raised the standard of revoit. As a consequence there followed the Majuba Hill fight, years of agration, the Jameson raid and finally long great war, which cost Britain £220,001-400 and the lives of \$5,000 of her sons.

And equally tiny sparks have kindled mainy other conflagrations. The borrowing of a tobacco pipe and its retention caused civil war in the Pamirs and Atspariston, while the stealing of a lace potticoat belonging to a Castile lady by a Moor led to a long conflict. The war between \$800 of Sweden suddenly discovering the field of the page in 1664, arose through a supposed slight.

The King of Sweden suddenly discovering the supposed streams and the supposed streams and

gan in 1654, arose through a suppose-sight. The King of Sweden suddenly discover ed in a despatch that his name and title ed in a despatch that his name and title gain in 1806, aloss thouse.

The King of Sweden suddenly discovered in a despatch that his name and titles were followed by only two etceters, while the King of Poland was given three result, declaration of war. More disastrous in its sequel was the throwing of a small stone by a Hinguenct child at the Duke of Guise, for it was the immediate cause of the measure of Varsey and of the thirty years war that followed it. It will thus he seem that no article is too worthers or a subject too trivial for the purpose of locating the dogs of war—not even the spilling of water. Mrs. Macham, the favorito indy-in-waiting to Queen Anne, was carrying a glass of water to her royal mistress when she solided with the Marquis de Torrey, on whose clothes the water was spilled.

The Marquis falling to get an apology, to ked upon it country. The base with and his country. The base without the intervention of the great Duke of Marlborensh and his brilliant campaigns.

But the most curious war ever waged over a little which was no extense whout the intervention of the filliant campaigns.

But the most curious war ever waged over a little most curious war ever waged ove

or the district.

He finally was influenced to stop hostilities by Luther, but was betrayed into a further set of hostility by treachery, and being captured, suffered death on the wheel.

Minard's Liniment Cures Diphtheria.

WHERE THE COAL COMES FROM. The United States has held first place among the coal producing countries of the world since 1899, when it surpassed Great Britain. In the eleven years since 1899 the annual output of the United States has nearly doubled, from 253,741,192 short tons to 501,596,378 tons, whereas that of Great Britain has increased only 20 per cent., from 246, 506,155 short tons to 296,007,699 tons. The following table shows the coal production of the principal countries of the world in 1910, except those for which only the 1903 figures are available.

NEW YEAR CALLS.

(Ottawa Journal.) The custom of paying calls on friends New Year's Day'is a fine old one, and it is a pity it has rather fallen into disuse. The few hours of the first day in the year necessary for such calls could hard-ly be used to better saventage.

Cures Old Folks' Coughs

Doe o't Disturb the Stoniaco, Easa. at Once and Cures Thoroughly.

'CATARRHOZONE" A BOON TO MANY THOUSANDS.

Because you are old is no reason for those terrible chest troubles and difficult breathing can be thoroughly cured with Catarrhozone. You simply breathe the healing vapor of Catarrhozone, and instantly its rich balsamic fumes are carried by your breath into the timest recesses of the nose, throat, chest, bronchiel tubes and lungs.

Just think of it—A direct breathable

medicine, full of soothing antiseptic pine essences that reaches every sore, congested membrane in two seconds. drugs to take—nothing to harm or sick-en the stomach, because Catarrhozone is the purest, safest cough, catarrh and cold remedy ever devised.

"For many years," writes Richard McCallum. Stirling, Ont., "I have suffered from Catarrh, and continually hawked and coughed, so that my throat was always in an inflamed, ir-itable condition. "Doctors' medicine did not help me

in the least, and all other remedies I used were quite useless. In one case it was time wasted in snuffing powder up the nose; in another using a greasy ointment, and so on. Not one of them was the least bit of good. "I heard Catarrhozone favorably

spoken of, and tried it. Really it bene-fited me more in a few hours than years of treatment with doctors' and other so-called remedies. "Receiving such immense benefit, I continued using Catarrhozone, and in a few weeks I was completely cured of Catarrh and throat trouble." Get Catarrhozone to-day. Large size costs \$1.00, and lasts two months. Smaller sizes 25c. and 50c. All dealers, or The Catarrhozone Company, Buffalo, N. Y.,

They took more interest than the men, and it seems that a larger percentage of them than of the other sex voted right. In the light of such work the announcement of the Anti-Suffrage women that they are going sor to hold a convention sounds like a politic fest.

THE THRIFTY SCOT.

(Westminster Gazette.)

Much is heard in these days of the cost of living having gone up, but it is rather curious to find that in spite of it all the smount of money deposited in the savings banks of the country continues to increase by leaus and bounds. A year ago the Edinburgh Savings Bank showed an increase in its funds of £106,000; this year it shows an increase of over £160,000. Not only has the amount deposited increased but the number of depositors has increased elso. So some Scots at all events still believe in taking care of the bawhees (Westminster Gazette.)

PSECIES USED FOR PULP-WOOD-1910

(Forestry, Press Bulletin No. 50.) Four species of wood are used to make up the six hund ed thous and cords. worth three million, five hundred and eighty-five thousand dollars, that were used by the pulp mills in Canada in 1910. These woods were spruce, balsam hemlock and poplar, as ascertained by the Dominion Forestry branch in a report soon to be published on the pulp wood consumption. The percentage of spruce, which has always been the chief wood used, is gradually becoming less, although still forming over over three-quarters of the total pulpwood consumption. In 1908, spruce contributed 87 per cent, of the total; in 1909, 83 per cent, and to 1900, 78 per cent. The importand in 1910, 78 per cent. The importance of balsam, the second species as a pulpwood, is increasing. In 1998, it formed 12 per cent of the total; in 1909, 16 per cent; and in 1910, 20 per cent. Another species which is rapidly becoming more important is hemlock, over five times as much being used in 1910 aig more important is hemlock, over five times as much being used in 1910 as in the year previous. The use of pop-lar fell off over one-quarter, a consump-tion of only three thousand six has approcords being reported for 1910. was the most expensive species, at \$6.05 per cord, or 64 cents more than in 1909. During 1910 balsam became reduced 55 cents, to \$5.71. Hamlock remained at about the same price for the two years and is still the cheapest species. In 1909 it was \$4.51 per cord, and in 1910. \$4.43. Poplar has increased eleven cents during the year, the price being \$5.92 in 1910. The prices of pulpwood are at fected not only by the properties of differences of differences. 1910. ferent species, but also by the condi-tions under which bought (whether in open market or on limits), and by the distance of the wood from the point of

WAS JOHN ORTH'S FRIEND.

An interesting personage has just visited France, and his adventures re call to our contemporaries those of "Robinson." as they always describe Defoe's hero. Born at Nice in 1871, Charles Manzoni went to Argentina in 1881 and later qualified as a surgeon. At Buenos Ayres in 1890 he was called to attend a ship's captain who had seen wounded in a fight with Chilean sail-

After the patient's recovery the doctor was retained and embarked upon the Sainte Marguerite, whose captain tor was retained and embarace upon the Sainte Marguerite, whose captain was John Orth, the Austrian Archduke, whose fate is a mystery. In the Straits of Magellan on August 25, 1900, during a terrible hurricane, the doctor was a terrible nurricane. The doctor was swept overboard by a wave and washed up on an island. When he regained con-sciousness the vessel had disappeared and the doctor concluded that she and her crew were lost. For eight months he lived (2) the island on the eggs of sea birds and fish and we are told he was less happy than "Robinson" because he had no gun. Then a ship appeared and took him to Patagonia.—From the London Globe.

Corns Between the Toes or on the soles of the feet, can be cured by a few applications of Putnam's Corn Extractor, which acts painlessly, quickly and with certainty. The genuine "Put-

nam's" always cures. Try it. THE FOOL THAT DROPS THE MATCH.

(Will Carleton in Harper's Weekly.) It has been said, that anywhere, The biggest fool afloat,

Is he who makes a rocking chair

Of some one else's boat;

But equal with him in the race, The eggs of woe to hatch,

Is, in unknown or known disgrace,
The fool that drops the match. What is't to him, if, in his haste A fragrant weed to try,
The folds of woman's pride and taste
Hang dangerously nigh?
What if a precious life recede With flame-enhanced despatch? He did not do the shameful deed;

He only dropped a match. What is's to him, if stores of wealth In flame may disappear, Or friends that walked in joy an

May nevermore come near? What if explosions upward spring, A hundred lives to snach? He didn't do much of anything; He only dropped a match,

Incendiary—guilty one (As yet not doing time)
You'll learn the lesson, ere you're done That careleseness is crime. But when your future home you view, And lift its red hot latch, No matter then how often you May drop the lighted match.

PILES CURED AT HOME BY NEW ABSORPTION METHOD

EDUCATION OF THE FARMER

The Canadian Pacific Railway Company is arranging with the governments of Ontario, Quebec and New Brunswick for a series of farm specials to be run during next spring and summer in con-nection with the agricultural colleges of those provinces. The object is the edu-eation of the farmer, who will be shown the latest and best methods of land culture, dairying, stock raising, fruit growing, and, in fact, everything par-taining to the farm. These trains growing, and, in fact, everything passistaining to the farm. These trains which consist of several baggage cars, fully equipped by the different colleges and manned by experts, who will have special coaches in which to deliver lectures on agricultural topics, will stop at the principal points on the company's and remain long enough to several at the principal points on the company's lines, and remain long enough to camable those attending the opportunity of gathering a great deal of valuable information regarding their calling. Besides the lectures, literature, fully explaining everything pertaining to farm life will be freely distributed, and every opportunity will be afforded farmers to cather a fund of useful knowledge. To accure a large attendance at their meeter a fund of useful knowledge. To escure a large attendance at their meetings, which will be widely advertised, the C. P. R. will offer cheap transportation to farmers and it is confidently expected their efforts on the part of the governments and the C. P. R. will excite greater interest in the productive confidence. greater interest in the productive capa-city of farm lands and benefit the whole country materially.

MAN WITH A LITTLE MONEY

Before the day of Bonds—an undertaking requiring a large mortgage was financed entirely by a Bank, an Insurance Company, or an institution having command of great sums of money. These institutions used the money paid them in deposits, policies, etc., to finance the undertaking.

Nowadays the mortgage is split into small denominations, called Bonds.

This gives the public—you—be opportunity to participate in an investment backed by the greatest possible security and paying excellent interest, often high as 6%.

Let us send you literature on Bonds in general and special issues from time to time. Send your name and address to go on our mailing list.
