ELEPHANTS LUMBERING.

They Were Not Only Doing Man's Work, but Doing It Man's Way. The elephants round us were dragring the logs to the mill to be sawed. They were harnessed for this with a broad breast band and heavy chains. A native looped the chains round the ogs, and the elephant started off with them and deposited them on the trolley. Others were picking up the sawed planks with their trunks and carrying them across the yard to be piled.

A mahout sat on the neck of every elephant, and if the animal picked up too small a plank the mahout would hint, with his iron spike, that two might go to that load. Then, grunting, the elephant would pick up the second with infinite delicacy of balance, turn, march over and deposit them beside the pile, always returning for another load so long as there were any planks ready. When there were none he would take his ease in the sun and wait, or perhaps there were heavy logs to be pushed from one place to another, and if pushing would do, with his trunk curled against the log, no elephant would give himself the trouble of picking it up any more than a housemaid will pick up a chair on casters.

More fascinating it was than I can tell to see the jungle patriarch kneel down to a heavy log, twist his trunk round it, place it on the top of the pile and then calculate its position and push and pull until it was square in its place. The oddest because the most reasonable thing was to see the elephant, pushing against the end of a very heavy log, stretch out one hind leg to give himself balance and purchase. That seemed to bring him somehow very near to us. He was not only doing our work, but he was doing it in our way.

Presently, with one accord, all the elephants dropped work and moved in

the direction of the sheds.
"That means it's 11 o'clock," said the foreman; "dinner hour. Not for himself could we get them to do a stroke of work from now till 3. It's their off time. At 3 they begin again and work till dusk, and they start about 6 in the morning, but they don't understand overtime."

TO SERVE WITH SOUP.

Mulligatawny-Boiled rice. Pea-Dried powdered mint, croutons. Hare-Red current, rowan or cranberry jelly.

Turtle-Lemon cut in quarters and handed separately. Clear Soup with Italian Pastes— Grated Parmesan cheese.

Clear Soup a la Colbert-Poached eggs on a hot dish on a napkin. Croute au Pot-Thin rounds of bread

dipped in the soup, then made crisp in Bouillabaise (a rich fish soup)—Croutons or thin brown bread and butter,

quarters of lemon. Artichoke, Thick Lettuce, Crecy, Bisques—Croutons or thin rounds of bread dipped in soup or stock, then made crisp in the oven.

The Baby Beetle's Cradle.

If at almost any time of the year we walk through the woods where the red, scarlet, black or pin oaks are growing that is, where we find those that ripen their acorns in two seasons and therefore belong to the pin oak group—we shall probably find on the ground fallen branches that vary in size from that of a lead pencil to that of one's thumb or even larger. These at the broken end appear as if cut away within the wood, so that only a thin portion is left under the bark. Within the rather uneven cut, generally near the center of the growth, is a small hole tightly plugged by the "powder post" of a beetle larva. Split open the branch or twig, when a burrow will be seen, and the little, white, soft, hard jawed larva that made it will be found or per-

haps the inactive pupa. A Russian Bear Story.

Here is an odd hunting tale from Russia: A certain count was out for bears and, tracking a dam and cubs, shot one of the latter, had it slung into his sleigh and drove for home, about fifty miles distant. Immediately after his arrival his gamekeeper announced that a huge bear had scaled the wall of the park. The count went out and shot it—the dam of the cub which he had killed and brought home! The faithful creature had followed her dead offspring those fifty miles at the same pace as relays of post horses and arrived in time to share the fate of her cub and to have a monument erected where she fell.

Mercury and the Sun.

The distance of Mercury from the sun varies owing to the eccentricity of its orbit. When he is nearest to the sun he receives ten and a half times more light and heat than we do, but when he removes to his greatest distance the light and heat are reduced by more than one-half. Even then, how ever, the sun blazes in the skies of Mercury with a disk four and a half times larger than that which he shows

to us on earth. On Other Nights. Mr. Goodthing—How does your sister like the engagement ring I gave her, Bobby? Her Young Brother—Well, it's a little too small. She has an awful hard time getting it off when the other fellows call!

Corroboration. Mrs. Biffson—My husband is really the neatest man I ever saw! Mr. Bangs—I should say he was! You ought to see the way he cleaned me up!—Detroit

Good Boys

Are the bad boys very often. The boy that's good for anything is generally pugnacious. He's a healthy animal, and the healthy animal will always fight

when a boy shuns the rough sports of his companions he is apt to be a weakling, and to be conscious of the fact.

A great many mothers have testified to the wonderful curing and strengthening power of Dr. Pierce's Golden Medical Discourage. rierce's Golden Med-ical Discovery. All strength comes from food after it has been perfectly digested and assimilated. By and assimilated. By curing diseases of the stomach and other organs of digestion and nutrition, "Golden Medical Discov en Medical Discovery, "enables the perfect nourishment of the body, which is thus built up in the only way a body can be built up—by food.

There is no alcohol in "Discovery," and it entirely free from opium, cocaine, and all other narcotics.

and all other narcotics.

and all other narcottes.

"Dr. Pierce's medicine has done wonders for my two sons." writes Mrs. M. Hartrick, of Demster, Oswego Co., N. V. "Both had scrofula. My eldest son was taken two or three years ago with hemorrhage from the lungs. It troubled him for over a year. He took Dr. Pierce's Golden Medical Discovery and has not had one in over a year. My younger son had scrofulous sores on his neck; had two lanced, but has not had any since he commenced to take your medicine."

Dr. Pierce's Common Sense Medical Adviser, in paper cover, sent free on receipt of 31 one-cent stamps to pay expense of customs and mailing only. For pense of customs and mailing of cloth binding send 50 stamps. Dr. R. V. Pierce, Buffalo, N. Y.

The Manx Language society has been formed and, to carry out its purpose of preserving the language of the Isle of Man, will send a phonograph to dif-ferent parts of the island, and old men whose accent is pure will speak into the receiver passages from the Scriptures, folklore stories, idiomatic sentences and proverbs. When the records are complete they will be kept at the society's rooms in Douglas. That is a novel use to which to put the phonograph. If Cicero and Pericles had only talked into one of the ma-chines and the records had been handed down there would not now be half a dozen ways of pronouncing Latin and

The House of the Future. Here is a prophecy by a Canadian newspaper: "The city home of the future will contain no stoves. Cooking will be done by power, the building will be heated from a central plant, elevators will run from cellar to garret and breakfast, lunch and dinner will be supplied from a co-operative center Not only will the house of the future be cleaned by power, but the dust will be removed by a pneumatic exhaust sys-

A London View of Us. "Americans," says a London journal, are coming over in greater swarms than ever, and soon the streets will be full of curiously quiet looking men in-weird coats with padded shoulders ending on the hips, long boots blobby at the tips and straw hats with no roofs. and women with brown faces and eyes with very white whites, green veils set one's teeth on edge."

THE LAW OF FINDING.

Against All Save the Owner the Finder's Title Is Perfect.

In common law finding is a qualified source of title to goods and chattels. Briefly, the law is that the finder has a clear title against all the world, excepting the owner. The proprietor of a coach or a railroad car or a ship has no right to demand property found on his premises. Such proprietors may make, in regard to lost articles, regulations which will bind their employees, but they cannot bind the public.

The law of finding was declared by the king's bench more than a hundred years ago (when it was the supreme court of common law in England) as follows:

A person found a wallet containing a sum of money on a shop floor. He handed the wallet and contents to the shopkeeper to be returned to the owner. After three years, during which the owner did not call for his property the finder demanded of the shopkeeper the wallet and the money. The latter refused to deliver them upon the ground that they were found on his premises. The finder then sued the shopkeeper, and it was held, as stated above, that, against all the world save the owner, the title of the finder is per fect. The finder has indeed been held to stand in the place of the owner. Thus A prevailed in an action against B, who found an article which A had originally found, but subsequently lost. The police have no especial rights in regard to articles lost unless these rights are conferred by statute. Receivers of articles found are trustees for the owner or finder. In the absence of special statute they have no power to keep an article against the finder any more than a finder has to retain an article against the owner. A finder must, however, use every

reasonable means to discover the owner of found goods before appropriating them to his own use. It has been declared that if the finder knows the owner or knows that he can discover him he is guilty of larceny in keeping or appropriating to himself the arti-

THE OLD SAILING SHIPS.

Why the Wooden Ones Were Better Than Those Built of Iron.

The sailing ship when I knew her in the days of her perfection was a sensible creature. When I say her days of perfection I mean perfection of build, gear, seaworthy qualities and ease of handling, not the perfection of speed. That quality reached its highest excellence in the discovery of hollow lines and departed with the change of building material.

None of the iron ships of yesterday ever attained the marvels of speed which the seamanship of men famous in their time had obtained from their wooden, copper sheeted predecessors. Everything had been done to make the iron ship perfect, but no wit of man had managed to devise an efficient coating composition to keep her bottom clean with the smooth cleanness of yellow metal sheeting. After a spell of a few weeks at sea an iron ship begins to lag as if she had grown tired too soon. It is only her bottom that is getting foul.

A very little affects the speed of a ship that is not driven on by an untiring propeller. Often it is impossible to tell what inconsiderate trifle puts her off her stride. A certain mysteriousness hangs around the quality of speed as it was displayed by the old sailing ships commanded by competent sea-men. In those days the speed was still a matter for the seaman's care. Therefore, apart from the laws, rules and regulations for the good preservation of his cargo, he was careful of his loading, of what is technically called the trim of his ship. Some ships sailed best on an even keel, others had to be trimmed quite one foot by the stern, and I have heard of a ship that gave her best speed on a wind when so loaded as to float a couple of inches by the head.-Joseph Conrad in Harper's Weekly. 1. 13.85

Fishing For Sheep.

When sheep were first introduced in-to Cornwall, England, a flock which had strayed from the uplands on to Gwithian sands were caught there by the tide and ultimately carried into St. Ives bay during the night. There the floating flock was observed from the St. Ives fishing boats, whose crews, never having seen sheep, took them for some new kind of fish and did their best to secure them both by hooks and lines and by netting. Those they secured they brought home trlumphantly next morning as a catch to which even pilchards were as nothing.

Hawk and Weasel.

A New Zealand paper relates that a

settler noticed a hawk flying about in a peculiar manner and crying out as if in pain. The settler obtained a gun and shot the bird, and investigation showed the cause of its distress was a weasel which was perched on the hawk's back, with its teeth buried in the bird's neck. Apparently the animal had pounced upon the hawk when it was on the ground and was carried skyward with the flight of its prey the flight of its prey.

"Smart" London Manners. A fashionable crowd is almost invariably bad tempered. People jostle each other vindictively and preserve a stony, icy glare the whole time. A man at a dance seeking his partner in the crush will not hesitate to push past women in a way that would probably shock his barbarian ancestors.— London Lady.

I know of no real worth but that tranquil firmness which brayes dangers without rashness.

The state of the s

A GOOD COMBINATION.

How to Make a Window Seat and Shoe Holder From Boxes.

A suggestion for a combined shoe box and window seat which makes a very attractive and comfortable piece of furniture is shown in the illustration The seat can be made of two small boxes and one long box or other equally good boxes of about these proportions, made of strong boards. The pro-

ATTE BOX WINDOW SEAT.

portions should be carefully preserved Remove one side from each small box, leaving the ends, top, bottom and one side. Place them on the floor a distance apart, with the open end at the front. Between these place the long box, having a lid fastened on at the back with hinges. Screw the sides of the end boxes fast to the sides of the ntiddle box, and across the back of the three boxes fasten a board to act as a back to the seat.

Canada Wants British Goods.

London, July 24—(C.A.P.)—Canada is sending good orders to Leeds for winter overcoatings and is the only colony doing business of any importance. Belfast linens are in good demand to the colonies (Changadaine) mand in the colonies. Cheap medium Huddersfield woolens are wanted especially in Canada, where the manufacturers are unable to complete with British producers. These items are from The Times financial and commercial supplement.

Scalded to Death.

Toronto, July 24.—A 3-year-old boy of Mrs. John Adams, 34 Nassau street, set fire to his clothes and they were burning briskly when his mother found him. Failing to beat out the flames, she put him under the water tap, but although the fire was extinguished the water turned to steam and scalded the little fellow so badly that he died.

Hanged on Apple Tree.

Port Carling, July 24.-Joseph Miller, a farmer, aged 74 years, hanged him-self to an apple tree in his orchard at 2.20 p. m. Saturday. He was dead when found. Deceased was in pros-perous circumstances and left a wife and large family. There is no accounting for his rash act.

Boarder Was Burned.
Kingston, July 24.—The Anglo-American Hotel was slightly damaged by fire yesterday afternoon. A boarder named R. H. Earle set fire to his bed In a second storey room while lighting a cigar and was badly burned about the legs and arms.

There are many able preachers in the world, but few listeners who grasp the full meaning of the argument produced.

Nervous Debility

Nervous Debility often results from excessive brain work and worry, as well as from excesses, and the abuse of nature's laws. It causes loss of energy and ambition, easily exhausted, failing memory, despondency, specks before the eyes, loss of vigor, tired in mornings, weak back, poor circulation, nervousness, dreams at night, weak limbs, poor appetite, etc. Don't wait until it's too late. Our New Discovery Treatment will positively cure you. Come and have a heart-to-heart talk with us to day free of charge. We will do more for you in one week than other Doctors in four, and at half the syense. Don't let poor circumstances keep you away. We Trust you until cured.

WE TREAT AND CURE ALL DISEASES PECULIAR TO MEN. CONSULTATION AND, EXAMINATION FREE. It unable to call, write for Question List for Home Treatment. Booklet sent Free (sealed).
