The 11

New Adoertisements,

THE ST. CROIX SOAP Manufacturing Co. WHAT THE TRADE SAYS.

WE, the undersigned GROCERS of St. Stepl WE, the undersigned GROCERS of St. Stephen, have much pleasure in recommending to all dealers in Laundry Soaps, the product of the St. Croix Soap Manufacturing Co. Their "SURPRISE" especially as being superior to any other soap for General Lundry purposes as well as for the toilet. Our customers claim that it washes equally as well in cold water as other soaps do in the old way by boiling; saving its cost in fuel alone, also the disagreeable results from boiling, filling the house with steam, &c., and we believe that it is well deserving the name it be rs, name it be rs,

SURPRISE" the Great Self - Washer. Their other Brands have given entire satisfac-tion, and we believe they are all they claim for

H. GANONG, Esq., St. Croix Soap Works, St. Stephen. Dear Sir,—Merit deserves to be commended. I thought I would just drop you a line to say that I consider your "SURPRISE SOAF" to be the best value I have handled yet. My customers prefer it to the well known "Welcome Soap. Keep up the quality and fortune awaits you.

Yours truly

YOUR GROCER FOR A CAKE OF PER S. S. " DAMARA" direct from Glasgow, "SEA FOAM.

It is pure white, highly perfumed, unsurpassed for the Toilet, and is especially adapted for washing Fine Linens, and the most delicate fabrics. It is chemically, a Neutral Soap, making it perfect for Toilet purposes. By its use you will completely avoid Chapped Hands and Rough Skin. The purchase of one Cake will make it a Household Word.

P. S.—Persons using our "SCRPRISE" will find it free from all substances that have a tendency to injure the clothing that most of the the so-called cold water Soaps contain.

TO ALL WHO DESIRE PURE FRESH WATER,

Water Supply by the Pierce System !

Pure Cold Water, sparkling and refreshing, from Nature's fountains in the solid rock or deep enough in the earth, that all impurities, foul drainage and filth are avoided.

To secure this we use one of the Celebrated Portable Artesian Well Drilling and Mineral Prospecting Machines, which can be transported easily on a farm waggon over any common road. Two men unload the Machine and set it up and are ready for work in one hour. For motive power for Drilling Machine, we use a steam engine (four horse) power.

If solid rock is to be penetrated to get a sufficient supply of Water, we drill a 7 or 8 inch hole through the earth or alluvial deposit, and down into the rock a few inches, using a water tight metal casing down to the rock, making a water tight connection with the rock to shut off the surface water and all drainage. We then use a six inch drill inside of the surface casing and go deep enough to make a flowing Well if necessary.

Procuring a supply of good well water is only a question of depth, as it is a settled fact that water can be procured in every country at depths that can be easily reached with our portable machinery. If the well is not made deep enough to flow, a small engine can be used or a wind mill erected, or the water be pumped by man or horse power, and the water be forced into a tank in top of the house (in tower of mill) or in any other convenient place, thus having an equivalent to a flowing

house (in tower of mill) or in any other convenient place, thus having an equivalent to a flowing well.

If a wind mill is used have the tank made large enough to hold water for at least one day's pumping to last through a calm. This solves the question of water supply. Pure drinking water nabundance can now be had from Nature's fountains beyond a doubt in any and every country on the face of the globe.

By this system good and pure drinking water can be obtained in any locality, in marshy or low swampy districts as in more favorable localities, the question being only one of depth. It never falls.

The expense of sinking a well by the aid of our machinery is much less than the cost of the ordinary sunk or dug well, besides the inestimable advantage of always having pure and fresh water free from contaminating influences.

Persons who desire information about prospecting for minerals, oil, or want an estimate for water supply, or a well, should write us fully and describe the geological foundation. State if it is clay, gravel, sand, hard-pan, boulders, sand-stone, soap-stone, lime-stone, slate, shale, lime-rock, granite, trap, quartz, gneiss or conglomerite rock and the probable distance through each, especially the distance from the surface through the earth to the bed rock. Also state distance from the distance from the well, and if above oblow the general are any overflowing springs near and the distance from the well, and if above oblow the general are any overflowing springs near and the distance from the well, and if above no below the general surface. How far off is the nearest mineral spring and its character. The elevation of and the distance from the direction of the nearest highlands, also lowlands, and the highest elevated land within one mile and twenty to fifty miles.

Among the many for whom we have drilled wells we are pleased to refer to the following from whom any information can be obtained if desired:

Messrs. Geo. Chandler and Thomas Colvell, Dorchester, N. B., ; Messrs. Christopher Atkinso
