DRINK HABIT.

Leaders Work to Lessen the Drink Habit Among Workmen.

John Mitchell Says Use of Intoxicants is on Decrease.

Toronto, Ont., Nov. 14.--The question of labor and the saloon was discussed this afternoon by prominent labor leaders at a mass meeting in Massey Hall. The Reverend Charles Steidle, a fraternal delegate to the convention of the American Federation of Labor, presided. The Reverend Mr. Steidle declared that the saloon and the labor habit must be divorced. "In too many cities of our country," he said, "there are unions which have a monopoly of the saloon. It is the duty of the municipality to provide for the saloon. What is needed to-day is a conservative society which shall provide substitutes for the saloons. The day will come when practically every labor leader will be a total abstemious. The members of the executive committee of the American Federation of Labor refrain from drinking in toxicants."

LEPINE DEAD.

Winnipeg, Man., Nov. 15.--Ambrose Lepine, Louis Riel's lieutenant in the Northwest rebellions of 1869 and 1885, died Sunday at St. Norberts, south of this city. He was one of the best known half-breed leaders in western Canada. Lepine lived for years in Minnesota after the standing rebellion, when a price was put on his head by the Dominion Government. He was pardoned and returned here.

BULB COMPETITION.

Mr. C. H. Peebles, 155 Sandford avenue south, secretary of the City Improvement Society, would like to have all entries for the bulb competition in as soon as possible. Intending competitors would confer a favor by attending to this at once. The season is now so far advanced that bulbs of all descriptions should now be in the ground, and the selection left in the hands of the seedsmen must be getting more or less limited. It is to be hoped that the entry will prove a large one. Information regarding the competition can be had from the secretary or from John A. Bruce & Company, and the Steele, Briggs Seed Company. Both these firms will also be glad to supply catalogues and information regarding the culture of bulbs.
