President of the Aero Club of Ameri-ca, has put \$30,000 at the disposal of Rear Admiral Bradley A. Fiske, U.S.N. retired, the inventor of the torpedo-

plane, for the development of a craft capable of carrying and launching a full-sized torpedo, the weight of which is 2,000 pounds. In announcing his On her way back to town last night

gift Mr. Cabot said he was convinced he Southern Shore excursion train was detained near Petty Harbour for the torpedoplane offered the only apparent means of destroying the Ger-man fleet, which, in Kiel and Wilhelmover an hour, owing to a horse getting its legs caught while crossing a shaven, is protected from attack by trestle in that neighbourhood. Some other war vessels, rows of mines, and of the woodwork of the bridge had to shore batteries. Mr. Cabot intimated also that if \$30,000 were not enough be sawed away by a number of men for the purpose he would enlarge his before the quadruped could be excontribution tricated. Fortunately the animal, Admiral Fiske's device, which he which was a valuable one, escaped patented in July, 1912, has been suc

practically unscathed. The train did cessfully operated on existing sea-planes , but torpedoes weighing no not reach the city until 11.10 p.m. planes, but torpedoes weighing no employed because of the inability o seaplanes and navigators to handle any greater weight. Now, how

ever, seaplanes are being produced which are capable of carrying this bulk of useful weight, and it apparport:-Douglas Adams, Gigantic and ently remains only to adapt one Novelity. them to the Admiral's device so that the torpedo may be 'carried rigidly, properly aimed, and launched at the

right moment So far as this country is concerned the development of Admiral Fiske's idea has been done by voluntary and private subscription. The Govern-ment did not take it up, although Great Britain, Italy, and Germany seemed to realize its possibilities, and there has been evidence to prove that they have experimented in its use though to what extent is not known. It is known, however, that the Brit ish began experiments with the tor-pedoplane in the autumn of 1913, and peroptane in the autumn of 1913, and in August, two years later, had de-veloped it to such an extent that a naval Lieutenant sank four Turkish vessels in the Sea of Marmora, using fourteen-inch torepdoes weighing 731 pounds each.
