Hr. Grace Notes.

It is with much regret we record the death, at British Columbia, through an accident, of Mr. George Makinson, son of Mrs. George Makinson of this town. The sad news was received by telegram on Monday last. For some years past Mr. Makinson had been engaged in the timber business. being the owner of a large mill, and and met his death through a quantity of lumber falling on him. He is survived by a widow and one son, besides a mother, two brothers, and three sisters, to all of whom we extend our sincere sympathy.

Mrs. Barrett, nee Miss Mary Pottle, laughter of Mr. and Mrs. James Pottle, Water Street West, is at present in town on a visit from Sydney. She is accompanied by her four children.

Victoria Street School, took place on Thursday evening last and proved a great success. The star items being a beautiful little operetta, entitled, "Snow White and the Seven Dwarfs." Each of the children, from the youngest tot to the older boys and girls, went through his or her part with a grace that won the applause of the large audience present time after time. Great credit is due Miss Butt, the Principal, and Miss Cron, for the pains and trouble that must have been taken to train such a large number of youthful performers, and the children are to be congratulated on the success of their performance. The proceeds, which amounted to about \$150.00, are to be devoted to the school.

The British Band Excursion to Bell Island took place on Wednesday, under conditions that were ideal. The steamer with the excursionists left the Public Wharf about 8 o'clock a.m., and returned Thursday morning about 7. Although not so successful num-7. Although not so successful erically as might have been wished, those that took advantage of the occasion were delighted with the trip across the Bay. A football team from town accompanied the excursionists, and a match was played with a Bell Island team, which resulted in a draw each side scoring two goals.

Mr. Allan Parsons, traveller for the Newfoundland Boot and Shoe Co., St. John's, is in town on a business trip.

Captain Dennis Hayse, who has , pany their son on his return to the

Mr. Alexander Parsons (Lal), son of the first mail 'plane between Canada and the United States. Mr. Parsons EVANGELINE.—The Perfect is leaving again on Wednesday, and Shoe for Women. Ladies' have many friends join in lots of good wishes for his future welfare.

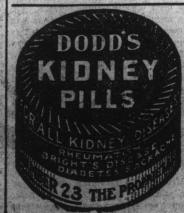

> Mr. Thomas Goff, formerly of this town, but for the past nine years or so of New York, came in by Saturday night's train to spend the summer vacation with his friends. Before leaving Hr. Grace "Tom" was a very popular official of the Postal Telegraph Office, and his old friends are very pleased to see him once more amongst them.

Another football match, this time between a Heart's Content team and a Hr. Grace eleven, was played in Shannon Park on Saturday evening before quite a number of spectators. including visitors from Bay Roberts. Carbonear and Heart's Content. The game, which was an interesting one, was won by Hr. Grace boys, scoring 3 goals against the visitors' 2.

Misses Mary Ward and Elizabeth Foley are in town on holidays from the Capital City.

Codfish are still very scarce on the Hr. Grace "grounds," not more than ten or fifteen quintals being under salt up to the present time. Caplin, which "struck in" here last week, have also disappeared, due no doubt to the heavy Westerly winds of the past few days. Fishermen are anxiously looking forward to a change in the weather-"a North Easter with a tumble" to stir up the fish, which is thought to be

in the deep water. CORRESPONDENT. Hr. Grace, July 11, 1920.

Issued By Authority.

Codfish Standardization Commission

TO THE FISHERMEN OF NEWFOUNDLAND.

PROPOSAL REGARDING THE METHODS TO BE ADOPTED TO IMPROVE THE CURE OF NEWFOUNDLAND CODFISH.

1. That the position of the Newfoundland Fisheries in relation to those of Norway. Iceland and Britain be placed before the fishermen and the public through the Press, and in any other manner that will illustrate the necessity for improving our cure of fish if we are to successfully market our fish in competition without that from

2. That a full and complete statement of the essential features of curing that must be adopted by all fishermen if the cure is to be improved shall be published and circulated throughout Newfoundland and Labrador.

3. That Inspectors shall be appointed whose duty it shall be to examine and inspect all fishery and curing stages, boats, etc., throughout Newfoundland and the Labrador with a view to-

(a) Explaining the methods to be adopted to improve the cure;

(b) Bringing about an improvement in the construction of sanitary conditions of Fishing Stages;

(c) To collect and distribute information as to catch of fish or other matters affecting the interests of the fishermen and the country generally.

NOTE:-The Inspectors should eventually be given authority to condemn stages that are unfit for the sanitary curing of fish. 4. That fish purchased from the fishermen by exporters, whether in St. John's

or in outports, shall be bought subject to a cull. 5. That all exports of fish from Newfoundland and the Labrador shall be inspected by duly qualified inspectors and certificates issued specifying the nature, style, cure and quality of the fish, and that specific standards shall, if possible, be laid down for the guidance of the Inspectors.

SUMMARISED, THE REQUIREMENTS MOST ESSENTIAL FOR IMPROVED

CURING ARE:

(1) Clean boats, stages and splitting tables.

(2) Well split fish. (3) Fish to be well washed from knife—all blood, liver and gut to be removed.

(4) Clean stage for curing fish.

(5) Regularity in salting.(6) Fish to be washed thoroughly on back and face when taken from salt bulk.

(7) Fish to be bled as soon as taken from the water when possible.

LABRADOR.

Same qualities for all markets.

No. 1 FISH.

Fish to be split to the crux of the tail, washed from the knife, free from blood stains, clots, liver and gut. To be firm, thoroughly salted and well pressed. To be washed out of salt bulk by hand. All slub and slime removed from back. To be dried sufficiently to stand shipment without loss in weight. Fish not complying with these requirements to be classed as No. 2 quality and to be stowed in such a manner in the vessel as to form a distinct part of the cargo.

SHORE FISH CURED LABRADOR STY LE

To be known as Imitation Labrador. All Shore Fish cured Labrador style will be graded as such and not as Labrador, and must be cured as above. The making of this quality of Imitation Labrador is not encouraged as the demand will be very limited.

The black should be removed from the fins of Shore and Bank Fish from 18 inches up. Such fish when well cured will be classed Extra No. 1 and will command the highest price.

CURING OF FISH.

Fish is an article of food, and this fact must be kept clearly before all those who have the handling of it from the time it is caught until it reaches the consumers' table. Unfortunately, this fact is lost sight of by nearly all those who are occupied in the Fisheries of Newfoundland, whether they be the catchers, curers or exporters. There is not sufficient care exercised by any one of the several classes of handlers. The fishermen in their anxiety to get their catch under salt forget the fact that the fish they are curing is to be eaten by some person many thousands of miles away possibly many months hence. The exporters in their desire to, first: secure a large stock, and second: to send it to market quickly, also lose sight of the same fact. This must change, and in future all interested in the fisheries must always remember that they are handling an article of food, and treat it accordingly.

The first essential feature of all processes for handling food products is cleanliness. The boats into which the live fish are thrown from trap or hook must be clean, sweet and free from gurry of past catches. The stage upon which the fish are thrown from the boat must be clean. The splitting tables must be clean and kept clean throughout the whole time that the fish is passing over it. The curing stages must be thoroughly cleansed before the season opens, and kept clean during the whole season. Pound boards should be well washed frequently. Water is plentiful and cheap and should be used without stint. Stages should be limed at least once every year,

With thoroughly clean boats, stage heads, splitting tables and stages, the first step towards good fish is secured. The next is cleanliness in handling the fish. All blood, livers and gut should be removed; all slime and gurry thoroughly washed off before the fish is put under salt. This can only be done by well washing the fish when split in plenty of clean water.

The fish should be split to the crux of the tail and laid open evenly without pock-The sound bone should be removed to about half an inch beyond the end of the sound, to allow the blood in the bone to drain out. If this is done the fish, on going to salt, will have every chance of turning out of salt bulk or pickle a perfect fish.

Salting should be done with care. Much fish is spoiled by irregular salting and by careless packing in bulks. Salting should be completed without delay. Fish should not be laid away to be salted at convenience. Washing out from salt bulk should be done by hand—every fish being washed back and face separately. Eighteen hhds. Cadiz salt should be used in salting Labrador cure. Shore cure should not be bulked higher than three feet and from ten to twelve hhds. Cadiz salt to the

The length of time for remaining in salt bulk or pickle is a matter for the judgment of the person in charge of the curing, as also in the curing once the fish has

In some cases it is thought advisable that hook and line men should throat their fish immediately they are removed from the hook. This permits the fish to bleed, and not only insure a whiter fish but retards decay of the fish.

The foregoing approved by the Standardization Commission W. F. COAKER, Minister Marine and Fisheries.
