SIDE LIGHTS ON MANY SPORTS

FANS ARE BECOMING FEVERISH

Fine Weather and Start of Major Leagues Is Causing London Fans to Get Anxious Over Opening of Canadian League -Other Towns Also Suffering With Baseball Fever.

With the beginning of the big leagues, and the 32pearance of the old familiar scores in the papers, that restless feeling is beginning to take hold of every loyal fan, and all over the Canadian League circu one can hear anxious murmurings as to when will one can near anxious marinarings as the Canadian League commence proceedings? The Cincinnati different clubs in the league are just about ready to St Louis put their 1912 teams in the field, and with the weather New York getting more baseballic every day, it will not be long Brooklyn before a large number of ball players will be gath- Pittsburg

ering at different parts of Ontario.

In London, the fans have long since caught that restless feeling that is only stilled in the fall when the cold weather come to freeze it out. Ever since the first robin came to notify the inhabitants that spring was on the way, this office has been besieged with inquiries as to when the Canadian League would open the season. Since the disappearance of the snow and the opening of the big leagues, these inquirles have been coming faster and faster, and it begins to look as though the local fans are having a hard time waiting for the day to come, so anxious are they to

see a game of ball. It is safe to say that never before were London fans so enthusiastic over baseball. Although great interest is being taken in the games in the major leagues, the interest in the coming struggle between the Canadian League is twice as great. With Frank Bowerman as the London team's manager, local fans can see nobody but London winning the pennant, and suggestions as to where the pennant will hang next season have been offered already.

NO KNOCKERS THIS YEAR.

Whether London will win the pennant or not is a matter of conjecture. There is nothing like displaying confidence in your own team, and where the local Canadian leaguers were handed a good many knocks last season, this year nothing but good is said of them. There is sot a fan in the city who does not think that London will have a real ball team this season, and that the very best article of ball obtainable in a minor league will be handed out at Tecumseh Park when the Canadian League games are played there. The other teams in the league are 100 per cent stronger than last season, and with two more teams to figure on in the race this season, a great contest for the league pennant will result.

Although Ottawa and Peterboro are both new to the league, the general opinion of the rest of the circuit is that both these teams will be dangerous this summer, and will be strong factors in the pennant race. Ottawa is resarded as particularly dangerous. With a man like Frank Shaughnessy behind the team, although not actually managing it, there is every reason to expect that the Capital will present a strong bunch of players. Shaughnessy has sixteen teams in the Central League to pick from, and as soon as these teams begin to farm out players, after the season is opened, it is certain that

TEMPLIN SHOULD HAVE STRONG TEAM.

Manager Templin, of Peterboro, should place a very strong aggregation in the Lift-Lock City. Templin comes from a state where ball players are born every minute, and he knows just where to get them, and how good they are before they come. The men that he has signed already are, for the most part, gathered at Reading, Pa., and reports indicate that Templin has been trying many of them out. In this way he will have the start on the rest of the clubs, for when he brings his team north to report, his players will be in fine playing condition, and the fact that some of them have worked together give them greater confidence than if they were playing together for the first time, as many of the players on the other teams will do.

Although the schedule has not yet been announced, and but vague information has been given out as to the opening dates, it is thought that the ball, a Peterboro team will open in London on May 14. This will please the local management, as they are fully confident that the Peterboro team will be one by Ki league, and this will give Manager Bowerman a chance to size up his new players. The fact that the Peterboro team will have lead on the other teams in the matter of training will make them a hard one to beat in the opening games, and this will suit the local management splendidly. Although the players signed by the London Club will come to London 'n good condition and ready to stack up against anything, they will need a good training in team work. They will have about two weeks to work out base by errors—Boston 1, Philadelphia 1. before the season opens, but with the uncertain weather which London generally gets during the end of April and the first week or two in May, it is hardly thought this will put them in mid-season form. However, only a few 2, Struck out—By Tyler 5, by Brennan games after the season opens and they should be in tip-top form, and it is a 5. Two-base hits—McDonald, Jackson 2, games after the season opens and they should be in tip-top form, and it is a safe bet that the London team will not start this year as they did last season. But what is the use of digging up, those bitter memories?

The Sherlock-Manning 20th Century Piano

COLONIAL STYLE 70.

A Permanent Investment

The final consideration of all careful piano buyers is summed up in the words: Will it endure?

Pianos can be made to look alike-they can be made to sound alike-even the resonant beauty of tone and fine singing qualities of a SHERLOCK-MANNING can be cleverly imitated. But-the final question is: Will these qualities endure?

Price and price alone is no evidence of the enduring qualities of a piano. When you buy a piano, make sure of the inside features—features that assure not only lasting tonal qualities, but also the lasting life of the instrument itself.

The piano you buy should have: The famous Otto Higel Double Repeating Action, Poehlmann Wire, the best imported Wickert Felt Hammers, none better; Billings Brass Action Flange, the latest innovation.

The Sherlock-Manning possesses all these, and every feature that makes for piano perfection.

See the Sherlock-Manning and judge for yourself. If you do not know our dealer, write us and we'll introduce you to him. Or we'll forward you inside facts and information telling you exactly how you can save considerable money and yet own one of the world's best pianos by buying a Sherlock-Manning 20th Century Piano.
