ABRASIVE ANNOUNCEMENT

Our new mill was completed on February 15, 1904, and from now on we shall be able to supply the wants of all our customers. It is the largest abrasive mill ever erected in any country, and has a capacity of from 5,000 to 8,000 tons per year of finished product. This product is absolutely uniform, and we can duplicate your orders indefinitely.

Emery is an iron ore containing 30% to 40% Corundum; it will neither polish nor cut like Crystal Mine Corundum which is virtually pure. Write us regarding a yearly contract.
