and the desire to render a service to the public impel me to make the following statements:

My college career, at New Haven, was interrupted by a sovere cold which suenfeebled me that, for ten years, I had a hard struggle for life. Hemorrhage from the bronchial passages was the result of almost every fresh exposure For years I was under treatment of the ablest practitioners without avail at learned of

Ayer's Cherry Pectoral,

which I used (moderately and in small doses) at the first recurrence of a cold or any chest difficulty, and from which I invariably found relief. This was over 25 years ago With all sorts of exposure, in all sorts of climates, I have never, to this day, had any cold nor any affection of the throat or lungs which did not yield to AYER'S CHERRY PECTORAL within 24 hours.

Of course I have never allowed myself to be without this remedy in all my voyages and travels. Under my own observation, it has given relief to vest numbers of persons, while in acute cases of pulmonary inflammation, such as croup and diphtheria in children, life has been preserved through its effects I recommend its use in light but frequent doses. Properly administered, in accordance with your directions, it is
