Stony and Dusty Surface of Concrete**

sorbs and holds dampness when the fires are out. The germ laden dust clings to it and summer heat multiplies the germ life. **When little specks of mould start to appear KONKRETO should be applied at once, for every speck contains millions of death dealing disease germs.** Apart from the highly unsanitary nature of concrete dust, it is very injurious to fine machinery, to musical instruments, and all sorts of delicate fabrics and furniture.

cost by preventing dust grits from entering machinery or products, or spoiling furniture or other contents of the structure. In addition it provides health and comfort for the inmates.

Send for KONKRETO Booklet giving prices and instructions for its proper application.
