GAVE PRIME MINISTER SOME UNEASY MINUTES

Mr. Borden Refers to Treatment of Manitoba by the Dominion Government.

OTTAWA, March 28.—(Special.)—R. L. Borden gave the prime minister a few uncomfortable minutes today over the Manitoba boundary question. The short discussion on the Sir Wilfrid Laurier was in the west last year he stated that if Premier Borden would go to Ottawa the boundary question could be settled in ten minutes.

Mr. Borden had come to Ottawa, and instead of a satisfactory proposition there had been submitted such a proposal that both the government and opposition of Manitoba had rejected it. What they wanted in Manitoba was equality.

Sir Wilfrid Laurier replied that so far he had received no communication from the Manitoba Government. When he arrived he was in a position to discuss it. It was quite true, he said, that he had stated that if Premier Borden came to Ottawa they could settle the matter in ten minutes.

Two Points at Issue.

"I am sorry," said the premier, "that in making that statement I presumed too much on Mr. Borden. He insisted that Mr. Borden was simply unwilling to discuss it. It was quite true, he said, that he had stated that if Premier Borden came to Ottawa they could settle the matter in ten minutes."

Mr. Borden said the prime minister was not doing justice to Mr. Borden. The latter had come twice to Ottawa without getting any suggestion or answer, and even after going back to Manitoba he had waited two months before an answer was made.

Alberta between the mine owners and operators.

An officer of the department was on the spot with instructions to act if the parties could not reach an agreement. A conference had been held without result, and a further meeting would take place on Wednesday. If application was made, a conciliation board would be granted immediately.

Warned by Ambassador?

J. E. Armstrong (Esq.) Leamington pointed out that according to the associated press the British ambassador at Washington had led the newspapers to believe that the members of the Canadian Government at Washington were warned by the British ambassador—political union, and asked what Mr. Borden had to say to that.

Mr. Fielding: "I do not think it would be fair in a matter of this kind to draw attention to some rumors in the public press."

Mr. Armstrong said this was in accordance with a statement said by the government to be the British House of Commons. The Associated Press was given a money grant by the government, and he assumed, therefore, that the news sent out would be correct.

Mr. Fielding replied that, while the government added the news service, no money was given to the British House of Commons. The Associated Press was given a money grant by the government, and he assumed, therefore, that the news sent out would be correct.

Mr. Armstrong asked if the department of justice had taken any action towards bringing Chas. D. Sheldon back to justice. Sir Alan Aylesworth answered that this was a provincial matter. If Sheldon was brought back to Canada, any information laid before him would have careful consideration.

Canada's Dairy Product.

Dr. Edwards (Frontenac) referring to the deputation of dairymen of Eastern Ontario which waited on the government some time ago, asked if the questions forwarded had received consideration from the minister of agriculture. He considered that dairy products ought to be graded and stamped, and if legislation of this kind was introduced, it would receive the support of both sides of the house. The average price of Canadian cheese, he said, was placed very much below what it should be. At one time there had been a reference in Montreal, but he had been dispensed with. He would like to see the referee reappointed. His presence alone had a good effect. Dr. Edwards made a strong plea for the establishment of a cold storage warehouse in Montreal for cheese, butter, etc.

Mr. Fisher declared that it was undesirable to enter into competition with cold storage warehouses of the United States. He said that a system of stamping and grading would be risky. It might result in more evil than good. As to the weighing of butter and cheese in Montreal, he considered that the dairymen had not used the official weigh machine of Montreal for their own protection.

LEVEE'S COUNSEL TURNS GUNS ON WITNESSES

Continued From Page 1.

to warrant calling for an investigation.

"My only complaint would be in that case that the teachers were being harassed."

Sturgeon Stewart, former secretary-treasurer of the Slocum Medicine Co., said he had been employed for a little over a year—the latter part of 1905, all of 1907 and a while in 1908. The company never paid any dividends while he was there. Asked concerning a statement about dividends in the annual report for 1907, witness said that Mr. Levee had prepared it himself. He denied with considerable show of heat the statement made by Mr. Levee that he had been fired, and he showed a copy of his resignation.

Mr. Levee had told him that he was buying in the stock of some of the shareholders at 25 cents on the dollar, representing to them that the company was going into insolvency. He had thus bought Mr. Rutter's \$15,000 and Mr. Powell's \$20,000.

"On the whole, my lawyer I sold him my \$5000 at 30 cents on the dollar. Objected to Canvass."

"He wanted me to endeavor to get teachers to take stock in the company. I considered it improper and only went to one at Mr. Levee's earnest solicitation. That was Thomas Smythe of Hart street Collegiate."

Mr. Smythe told me that his position was not any too secure and therefore he could not afford to buy stock in anything. I told him that Mr. Levee had said it would not do him any harm.

"I thought it a very improper thing to solicit teachers. I was told to tell them we were paying 15 per cent. dividends, but the company didn't earn any."

Further witness stated that Mr. Levee told him that teachers ought to be good marks.
