locomotives of the New York, New Haven and Hartford Railroad, and it was found in designing these beds that the weight of the parts assembled in the usual manner would greatly exceed the allowable limit. It was, therefore, decided to try the experiment of casting them, and this has been entirely uccessful. The locomotive bed is 32 feet 4 inches

The locomotive bed is 32 feet 4 inches long, weighs 17,000 pounds, and is probably the most difficult casting of its kind ever attempted. This single unit replaces a very large number of parts, greatly reducing the weight and increasing the strength. Numerous bolts and nuts have been eliminated that become loose and allow play, especially at the pedestals. This will result in a considerable saving in the cost of maintenance and repairs.

Removes Hairy Growths

Without Pain or Bother

(Modes of Today.)

It is not necessary to use a painful process to remove hairy growths, for with a little delatone handy you can keep the skin entirely free from these beauty destroyers. To remove hair, make a stiff paste with a little powdered delatone and water. Spread this on the hairy surface and in about 2 minutes rub off, wash the skin and the hairs are gone. To guard against disappointment, be careful to get real delatone. Mix fresh as wanted.—Advt.
