"The great trouble with the poultry business has always been that the laying life of a hen was too short," says Henry Trafford, International Poultry Expert and Breeder, for nearly eighteen years Editor of Poultry Success.

The average pullet lays 150 eggs. If kept the second year, she may lay 100 more. Then she goes to market. Yet, it has been scientifically established that every pullet is born or hatched with over one thousand minute egg-germs in her system—and will lay them on a highly profitable basis over a period of four to six years' time if given proper care. How to work to get 1,000 eggs from every hen; how to get pullets laying early; how to make the old hens lay like pullets; how to keep up heavy egg production all through cold winter months when eggs are highest; triple egg production; make slacker hens hustle; \$5.00 profit from every hen in six winter months. These and many other moneymaking poultry secrets are contained in Mr. Trafford's "1000 EGG HEN" every BREAKEY SELLS THEM—Reliable used oars and truck., all types. Sale Market, 46 Carlton street.
