BUSY TIMES IN MONCTON.
A Boom in the Cotton Mill
 ---Interesting Scott Act Case
 ---The United Baptists.

MONCTON, Nov. 6.—The Moncton cotton mill is a busy place these days. Manager Jackson states that the mill has the biggest rush of orders known for the past six or seven years. The orders are being turned out as fast as possible, but if no more orders come in, it will be kept busy for some time working on those now on hand. The mill is employing 225 hands at present and employment could be given to 25 more if they could be secured.
 A rather unique Scott Act case engaged the attention of the police court this afternoon. The case was brought by the wife of a well-known resident of the city against the proprietor of a hotel on Duke street. The woman was complaining of the case and appeared in court to prosecute the charge without an attorney. Her main witness was her husband, whom she had taken from the saloon and incidentally destroyed some liquor during her visit to the saloon. The woman also gave evidence herself and the case was stood over until tomorrow. Considerable interest is taken in the case on account of the tactics adopted by the woman to stop saloon keepers selling her husband liquor.

Mr. McKinnon has sold his beautiful estate, "The Grange," to W. H. Miller, of Campbellton. The price paid was \$300.
 It is now understood that the case of Emmons vs. Maddison, which is to be argued before the Privy Council of England will not come up before January or February next. Mr. Powell, who will argue the case for Maddison has been notified by his London agent that the case will not be reached this month and it will probably go over till along the first of next year.

The United Baptist church of this city, which has been undergoing extensive repairs, and been considerably enlarged, will be reopened on Sunday next. The Moncton church is the first in the province to carry into practical effect the union of the two Baptist denominations and the occasion of the re-dedicating of the church is to be of more than ordinary interest. Three services will be held. The Rev. J. H. McDonald of Fredericton will preach in the morning and the Rev. Dr. McLeod of Fredericton, will preach in the evening. Rev. D. MacDermid, pastor of St. John's church, will conduct the afternoon service.

CONVANSING THE CITY.
 There is one school in this city whose students are never heard of in the matter of looking for positions, and the reason is plain. The school's representative organ, the business office just as energetically as they canvass for students. Business men and employers of labor are notified by the school of the qualifications of its students; they demand bona fide evidence that the applicant is capable of performing a certain amount of correct work in a day. This evidence is provided by the Curtis Business University, Limited, hence the reason why this school is able to report so many positions filled at salaries \$200 to \$500 per year.

WEDDINGS.
Reid-Armstrong.
 A happy event takes place in St. Stephen's church tomorrow morning, when Miss Annie Reid, daughter of Mr. G. Armstrong, will be united in marriage to Thomas Reid, lumber agent, of Moncton. The bride is the daughter of Mr. Armstrong, who has been in the employ of Macaulay Bros. for about five years, and has in that time made many friends who will wish her every happiness in her married life.

A CHANCE FOR CARPENTERS.
 Tomorrow morning will see the last of the Fair of Nations, when there will be sold by public auction in the St. Andrew's rink all the lumber used in the construction of the various booths. There is quite a large quantity of good material, which will no doubt be of value to carpenters. The proceeds of the sale will go toward the building fund of the new Y. M. C. A. building.

THOSE CASES OF FEVER AND THE PROBABLE CAUSE.
Dr. J. P. McInerney Shows First Case Did Not Come From Moncton—Very Dry Autumn Responsible, but People Should Avoid Water From Wells in Vicinity of City.

St. John, N.B., Nov. 7, 1906.
 Sir—I hate to spoil a nice little story, but noticing under flaming headlines in the daily papers that the supposed original cause of the outbreak of typhoid fever on Douglas avenue was a case said to be imported from Moncton in the person of Mrs. Harry McCullough, I deem it my duty, as attending physician in that case, to correct that statement. Mrs. McCullough was back in her own home in St. John between three and four weeks before she showed any symptoms of the disease.
 Both Drs. Burney Yeo and Odele state in their "Practices of Medicine," and as every reputable physician should know, that the period of incubation of typhoid fever is a week to ten days.
 Under these circumstances, it would appear that the case of typhoid fever in the case of Mrs. McCullough was not imported from Moncton, but was contracted in St. John. The fact that the case was not imported from Moncton is further established by the fact that the patient was not in Moncton at the time she contracted the disease.

In reference to the examination of water supposed to be infected with the typhoid bacillus, Odele states: "The detection of the typhoid bacillus in drinking water is by no means easy, and the question in individual cases must be settled by experts who have had special experience with this germ."
 After all, Mr. Editor, why this typhoid in a town over a few cases of typhoid fever? When we take into consideration the fact that the drinking water of this city is not purified, and the fact that the typhoid bacillus is very hardy, and can survive in water for many months, it is not surprising that we should have several cases of typhoid in this city. I do not think the way worn and thrifty should regard "Black Tom's Wall" as that certain spring we have all heard of before.
 Sincerely yours,
 J. P. McINERNEY.

LEARNING A LANGUAGE.
An Evening Spent With Prof. Dodge, Who Teaches the Natural Method.
 It seems hardly credible that in five short weeks one can acquire sufficient grasp of the French language to enable him to transcribe at all of English, or to travel through France without the aid of an interpreter, or to read any ordinary French book or write even a few lines of French. This is the claim made by Prof. Dodge, who is now conducting classes at Old Police's hall. The system is a natural one, and is really possible and without a very great deal of effort on the part of the student.
 A Times representative visited the class room of English in the evening, and saw a practical demonstration of his method. Not only does he start with the natural method, but he starts with the natural method, and he starts with the natural method, and he starts with the natural method.

MUST PAY FULL FARES.
 Ottawa, Nov. 6.—(Special)—Civil servants traveling on government business will be required to pay full fares on the Canadian Pacific, where there is a special rate to government employees. Therefore, when going on government business in that part of the country officials have availed themselves of the reduced rate. A circular is being sent by the deputy minister does away with this now and orders that the full fare be paid and charged up. The railways are "in" that much. For civil servants going on vacation or on personal business the cheap rates will still be available.

PERSONAL INTELLIGENCE.
