Some of the other scores made throughout the Dominion are as appended: Fifth Regiment, New Westminster, 8th team, 718; 2nd Batt., South Farmington, N. S., 1st team, 658; 2nd team, 628...

REV. S. CLEAVER

Bids Farewell to His Congregation Yesterday Evening.

A large congregation filled the Metropolitan Methodist church yesterday evening, when Rev. Solomon Cleaver, who has just been ordained, and presented the pastor of that church, preached his farewell sermon. Rev. Mr. Cleaver took for the subject of his discourse the prophet Ezekiel's dream, and in most graphic manner he alluded to the small stream which Ezekiel saw in his dream flowing out from under the doorway of the temple in an easterly direction towards the desert as being the stream of Christianity flowing from the churches to the heathen - residing in the desert lands.

CUT RATES TO FRISCO

A Rate War Now on Between the Pacific Coast S. S. Co. and Steamers Cleveland.

Thistle Leaves for West Coast - Japanese Man-of-War - Glory of the Seas.

A large number of Victorians, notwithstanding the heavy sea running, visited the Japanese man-of-war Hiyer yesterday afternoon and were hospitably entertained by the courteous Japanese sailors. Yesterday was an off-day for the sailors, and those who were not in the party granted leave ashore amused themselves by playing cards, and passing the time pleasantly in a thousand and one different ways.

OVER THE FALLS.

An Unknown Man Drowned in the Kootenay River.

Nelson, May 27.-News has reached here of an unknown man going over Kootenay falls on a raft. Andrew Joly, who has a contract for getting out wood for the Hall mines, went fishing with James Moriarty and another man on Sunday afternoon, and while sitting on the river bank, about eight miles from Nelson, they were startled to notice a bearing coming rapidly down stream, and seeing that the poor fellow was without a paddle and was being swept onward to a watery grave over the falls, a short distance below where the fishermen were sitting. The current at this point is about 15 miles an hour, so that it was utterly impossible for the man on the bank to render any assistance.

The doomed man frantically shouted and gestulated to the horrified washers to save him, but until the raft had been swept past the fishers did not seem to give up hope. Then with a hopeless, despairing gesture he fell upon his back and Joly and his companions were compelled to stand by helplessly as the raft with its human freight disappeared over the brink of the foaming cataract into the seething torrent below.

PROPHESIED DAY OF HIS DEATH

A curious story was told in the course of an inquest on the body of Dr. Richard Richardson, a medical man, who sustained injuries by a fall from a bicycle, while descending Buxted Hill some time ago. It was stated that the accident occurred through the doctor having missed his pedals just at the foot of the hill. As a result, he fell over the front of the machine, which fell upon him. Dr. E. H. Black, of Buxted, who afterwards attended him, said the deceased gentleman appeared to have been in the best of health, and proceeded as declared, but on Sunday, April 23, he declared that he knew he should die of tetanus on the following Sunday. Dr. Black saw no indications of such a complication, but the deceased was so positive that on Tuesday, the deceased lay, anti-toxin was brought from London, the deceased being positive that that was the only cure for tetanus. On Thursday last Dr. Richardson said he knew tetanus had developed, and in the evening Dr. Black noticed the first symptoms, which rapidly increased, and ended in death on Sunday last. The jury returned a verdict of "Accidental death." Dr. Richardson was for some time house physician and resident apothecary at the London hospital under the late Sir Andrew Clarke. He was also an examiner of the Society of Apothecaries. -Belfast Weekly News.

THE SIZE OF SIAM.

The Kingdom of Siam, whose monarch is soon going to visit us, plays little part in the affairs of the world, not as a matter of fact, of very considerable dimensions, and under an enlightened and energetic government could become a power of great importance in that quarter of Asia. The Siamers' dominions extend over 1,100 miles from north to south, while at their greatest breadth they are about 550 miles from east to west; this breadth, however, is obtained only at one point, for Siam is long and narrow, the country comprising the valley of the Mekong and the Malay peninsula. The rivers are its trade routes and its roads. Like Egypt, the country consists of strips of land along the stream and valleys, the greater portion of the territory being an almost impenetrable jungle.
