

Why thoroughbred Poultry Pays the Farmer

By J. R. COTE

Some one has figured out that the American hen in a year earns enough to buy all the silver and gold dug out of our mines...

Secretary Wilson says that she is producing one-half billion dollars annually, and she is a formidable competitor of wheat for precedence on the farm.

In spite of all this, chicken raising on a commercial scale often results in failure. The world's supply of poultry and eggs is not obtained from great centralized, chicken plants...

Thoroughbred stock will bring a better price than mongrels when the commission merchant or packer's agent comes around to buy, because he says so himself.

What approximately is the average price that you pay for chickens during several months in the year?

Why do you buy poultry at all? Do you buy a better price for thoroughbreds than for mongrels?

Do you find any difficulty in getting as much poultry as your business demands require?

Do you pay a better price for thoroughbreds than for mongrels when the commission merchant or packer's agent comes around to buy, because he says so himself?

Do you pay a better price for thoroughbreds than for mongrels when the commission merchant or packer's agent comes around to buy, because he says so himself?

Somehow out in the Bay of Fundy, a Quaco Head about 3 o'clock Saturday afternoon. She soon drifted into the bay and filled with water. The captain and crew, consisting of Mr. Huxford, Maitland, and an old man whose name could not be learned, reached shore with our choppers some loaded. It was thought the vessel would soon be on pieces on the rocks, but late Saturday night she floated and drifted out into the bay, lying on her side. With the wind of shore she floated toward the Nova Scotia coast, making a great danger to navigation.

These questions embodied in a letter sent out on October 15 by Mayor Frink to bank managers and capitalists in the city, asking for an expression of their opinions, have resulted in a number of replies, suggesting various reasons for the adverse conditions, and also suggesting possible remedies.

Another writer says the difficulty in regard to industries in St. John is that they have not enough capital to start with and if there were started a few enterprises that were successful there would be no difficulty in getting others. He thinks the exempting of city bonds would not help the difficulty. He advocates the abolition of the tax on personal property though he does not know how the difference could be made.

Another writer, after referring to the beautiful climate here and to the fact that St. John is an old established city, says in spite of this there are very few capitalists living on their money in St. John. As soon as they make their money they prevail in other cities in Canada.

There were a number of other replies, all in a similar vein.

The fourth anniversary of the Jesmer branch of the Women's Missionary Aid Society was celebrated on Wednesday evening, Nov. 2, at the home of Mrs. J. E. Fletcher.

John A. Segee AGAIN ARRESTED

Charged With Assaulting Dr. Alward and C. W. Adams-- Trouble Arises Over Land Claimed by Turnbull Real Company.

John A. Segee, a resident of Millidgeville road, was arrested on Saturday afternoon by Sergeant Kilpatrick and Police-man Ferry, of the North End division, on a warrant charging him with assault on Dr. Silas Alward and Charles W. Adams. This arrest comes as a sequel to the case of the Turnbull Real Estate Company vs. John A. Segee, which occupied the attention of the courts for some time about two months ago.

According to the story told in the court, Segee is living on a piece of land out the Millidgeville road which he claims is his, being left to him by his father, who claimed it by squatter's right. The Turnbull Real Estate Company, however, claims the land. Segee had built a house on the land and was also doing some prospecting thereon. The decision of the courts was in favor of the Turnbull company, and Segee was told to remove. The house was torn down and the man vacated the premises. Some weeks ago he returned and started erecting another house on the lot, saying that he had received legal advice justifying his action.

It appears that Dr. Alward and Mr. Adams, representing the Turnbull company, went out to stop the operations, and it is alleged that Segee drove them both away. They swore out a warrant for his arrest and he is now occupying a cell in the police court, tomorrow morning. Segee's friends say he has retained Fowler & Jonah, of Sussex, to look after his interests.

W. W. Hubbard, Mr. Hubbard remarked that the present was an off year for apples and only comparatively few of the orchards of the province were represented in the exhibition. He hoped the show would be appreciated by the people of this city and the province generally. Apple growing he described as one of the most profitable farm businesses that could be engaged in. A great deal was said nowadays about apple culture on the Pacific coast, and people were sending their money there for investment. What the government and the association hoped to see was people investing more money and showing more faith in their native province. There was room in the St. John valley for 1,000,000 more apple growers than there were now. There were all values just as suitable, the Pettaud and

H. M. Maxwell, Mr. Maxwell congratulated the fruit growers' association on the excellence of the display they had brought together. The account of private business Dr. Landry had not been able to present last night, but he would be here today and tomorrow. He thought the province had in Mr. Turney, the horticulturist, the right man in the right place. The time was, he confessed, when he had felt sceptical as to the apple growing capabilities of New Brunswick, but a visit to the Andover orchard had opened his eyes. He had seen there as fine a display of apples as it was possible to see anywhere, and in his opinion the apples from this province were superior to those from Nova Scotia.

Prof. Macoun, Prof. Macoun, dominion horticulturist, said he had felt proud of New Brunswick when he entered the rink and of what had been accomplished in a comparatively short space of time. For years he had felt that the people of New Brunswick had in Mr. Turney, the horticulturist, the right man in the right place. The time was, he confessed, when he had felt sceptical as to the apple growing capabilities of New Brunswick, but a visit to the Andover orchard had opened his eyes. He had seen there as fine a display of apples as it was possible to see anywhere, and in his opinion the apples from this province were superior to those from Nova Scotia.

County Secretary Kelly will meet with the board of assessors in the parishes to consider default tax lists, in Dean's hall, Masquash, Nov. 2; Masonic hall, St. Mary's, Nov. 5 and 7; Court room, Fairville, for Lancaster, Nov. 12; Lee Bros. store, Little River, Simonds, Nov. 15.
