

A LIFE SENTENCE

Don't discount the work you your cows do by using any other than the DeLaval Cream Separator. It's hard on your purse and not fair to the cows.

DeLaval Cream Separators

SERVE FOR LIFE

Seed Knowledge

We tell about it
in our

Free Catalogue

If you are at all interested in Seeds it will pay you to drop a line asking for our annual Catalogue. Thousands of dollars are wasted annually by Canadian farmers.

They buy seed, sow it and wait for results. When the grain grows sparsely instead of thick and full they attribute it to the ground, when in many cases the failure is caused by poor seeds.

Our Free Catalogue tells you how to remedy this. Write for it to-day.

DARCH & HUNTER SEED CO.
Limited
LONDON, CANADA

Our Seeds will bear Government inspection.

Sound on the Tariff Question

The International Harvester Company of Canada's views seem to be sound on the tariff question. In the first place they are opposed to any increase on agricultural implements under the present schedules governing the principal items of raw material that enter into the construction of agricultural implements. They are in favor of a uniform tariff upon all agricultural implements; they are opposed to any increase of duty on the items entering into the construction of agricultural implements; they suggest that any items entering into the manufacture of agricultural implements not at present made in Canada should be placed on the free list or in any event not subject to a higher duty than 5 per cent.; they are opposed to any increase in the tariff on extra parts to agricultural machinery, and, lastly, they are opposed to placing any additional burden upon the farmers by the imposition of a duty on binder twine. The company is a Canadian concern, with a large plant at Hamilton, Ont., and it is refreshing to hear of manufacturers who have some consideration for the other fellow.
