

BUILT TO GIVE LASTING SERVICE

NO cream separator in the world is made from finer materials than the STANDARD. For instance, the Gear Spindles are made from a special grade of tool steel, ground and polished—a steel so hard and wear-resistant that tools are made from it for drilling through ordinary steel. This special tool steel costs five times as much as steel in ordinary separators, but ten ordinary spindles wear out before one STANDARD spindle.

The STANDARD'S Discs are made of steel heavily and smoothly tinned. Stand on one and test its strength in comparison with aluminum or tinned iron discs.

The Bowl Bottom is made of special steel forging. If the STANDARD'S bowl falls on the floor it won't bend or break.

NOT THE ONLY REASON

In fact every part of the STANDARD cream separator is built to give lasting service. But that's not the only reason you have for selecting the STANDARD cream separator. There are for instance, several features that add greatly to the convenience and satisfaction of owning a STANDARD.

For example, there is the Wide Open Bowl, so easy to get at and wash. No tubes to clog up, either. Then there is a disc holder on which the discs are all washed together in about one minute. The discs are numbered so that they cannot be put together wrong.

Then too, the STANDARD Bowl doesn't leak. That's because the bowl shell fits tight without screwing down on top of a rubber ring, causing wear on the rubber and allowing the milk to leak through when the bowl is revolving.

Another good feature is the Interchangeable Clutch. When you stop the crank the gears all stop and the bowl runs down of its own accord and without wear. The Interchangeable Clutch also enables you to "pump" the handle and start the STANDARD quickly and easily.

Standard

OTHER BIG FEATURES

Other big features of the STANDARD, such as the Self-Oiling System—the Centre Balanced Bowl—the Liberal Space between Disc Edges and Bowl for Accumulation of Impurities—the High Crank Shaft—the Low Supply Can—the Enclosed Dust-Proof Gearing, were emphasized in previous advertisements.

So why go further. You've already learned enough to know that the STANDARD is the convenient and efficient machine, and is built to last long. In fact, tests go to show that the STANDARD should give 25 years of service.

One test given the STANDARD was equal to skimming 100 lbs. of milk every day for six years. At the completion of the test there was no wear visible on the working parts. The STANDARD was easily good for 20 years of service after the test.

Write for Booklets

We take it for granted you are interested in this test. And we would like to send you our booklet describing it fully. Also booklets showing construction of the STANDARD and containing records of skimming tests.

Send us your name and address promptly. Booklets will be mailed to you by return mail.

P. S. A Merry Christmas and a Happy New Year to our Friends, Patrons and the Public Generally.

At Guelph

WHEN you visit Guelph, make it your business to see the equipment of the Dairy Stable and the New Dairy Barn at the Ontario Agricultural College. Note also the equipment of the building where the Fat Stock Show is held. The equipment in each case is

LOUDEN Equipment

Feed and Litter Carriers, Steel Stalls and Stanchions and Hay Tools LOUDEN EQUIPMENTS were installed because they are worthy—that's the long and short of it. For the same reason Louden Equipments are to be found in the barns and stables of many hundreds of Canada's best farmers.

VISIT OUR FACTORY IN GUELPH, if you can. Visitors are always welcome. To see Louden Equipments being made will convince you that they are right from first to last. They represent the concentrated, intelligent effort of nearly 50 years on the part of men of vast experience. The result is that to-day Louden Equipments are the Standard of the North American Continent.

In any event, send for our catalogue, "Louden Perfect Barn Equipments." It will give you many good ideas. Posted free on request.

THE MECHANISM of Louden Equipment is the Acme of Simplicity

STUDY out this Winter the whole matter of your new barn and stables, if you are building; or the making over of your old barn and stable, if only remodelling.

Our Barn Architect Will give You HELP FREE

His experience and advice can help you from making mistakes, and save you many dollars. Many others have used this help. They will tell you what they think of the kind and value of the assistance our Barn Planning Department gives. Names and addresses on application.

A last word. You can save a hired man's wages by equipping your barn with Louden Equipments. Put that in your pipe and smoke it. Then ask us to prove it.

A Lad can work Loudon Feed and Litter Carrier with ease
