

USE

"Corona" Dry Arsenate of Lead

for
Spraying Orchards and Potato Plants.
"CORONA" dry is not an experiment, it has been used by many of our leading farmers for years.
One pound of "CORONA" will do the work of from two to three pounds of Arsenate Paste, and be more effective because:—
It is a perfect, dry, fine white powder, and does not contain 50 per cent water.
It is pure and contains nothing but Lead Oxide and Arsenate Oxide, the only two chemicals essential of an Arsenate of Lead.
It gives an even application, covers more thoroughly, and sticks to foliage longer.
It mixes easily and readily in water, no working up to prepare for the spray tank. No straining. It is only necessary to shake the proportional amount into the spray tank.
By using the same weight each time you spray, your mixture is always the same strength.
No sediment, no lumps, no water, never clogs spray nozzles.

"Basic Slag"

On account of war conditions Basic Slag is the cheapest fertilizer you can buy today. But we can always supply you with mixed fertilizer. But in our mind Slag is the best value for a farmer to buy this season. Ask us for prices by the car load delivered at your station. Also don't forget us on Seed Oats—we have a very low price on them. Banner, Sensation, also Black.
