## R. R. NO. 2.

Mr. Editor:—Will you permit a brief reference to an item in the Durham correspondence in last issue of "our paper, wherein indignant reference is made to the proposed closing of Durham post office and that people living within a quarter of a mile from this office should be compelled to get boxes."

I fancy there will be no compulsion if they prefer to go to Pictou for their mail.

This information is given in the public: "The rural delivery mail is not satisfactory at all." This individual, who seems to be as yet not served by rural delivery, presumes to tell all and sundry how it works. But a further statement is added that "our daily papers come a day late mostly all the time." Of course "nearly all the time" is not a clear expression to the uninitiated, but in so far as it refers to R. R. No. 2 it is not true. No daily papers are delivered within a half mile of Durham. Neither are any papers, where delivered, a day late, only occasionally and rural delivery can only deliver what is received. This is seemingly an attempt to circulate a new story regardless of the injury done, or as to its truthfulness.

## TO WATER CONSUMERS.

Will water consumers please remember that the supply of water, just now, is far below normal, consequently it is the duty of everyone to see that no waste is permitted. Shop window washing is one form of waste that ought to be stopped. In fact those served from mains on lower levels have an opportunity to practice the Golden Rule.

J. W. SMITH, Mayor.

It isn't necessary to feed flies by hand.
