RUSSIA AND TURKEY. RUSSIA AND TURKEY. The News from Constantinople is—that the proclamation of war against Russia by the Sulfan, has been affixed to the chief mosques of the capital, but actual hostilities were to be delayed until sufficient time had elapsed to allow a messenger to reach St. Petersburgh with a summons to the Empe-ror to evacuate the principalities.—This would occupy an interval variously compu-ted from eleven to fifteen days, at the ex-piration of which period Omer Pasha would commence hostilities, without, however, as they say, meditating the passage of the Daunde.

Da Daunde. The Czar plainly induces upon a Protec-torate, to which he has not the shadow of a title; the Porte refuses to concede any ground whatever, whereupon the Czar can either now, or hereafter, build up hopes for the eventual acquisition of a power over Ottoman subjects, or of territorial aggran-dizement; and the Western Powers, as we were sure they would all along, are reso-lute in supporting the Sultan in his resis-tance with the whole weight of their united

power. Three Cabinet Councils have been held Three Cabinet Councils have been held at Downing-street since our last, and not a doubt exists but that Ministers are unan-imous in the decided policy they have now concerted. It was even reported that six regiments in Ireland had received orders to hold themselves in readiness to embark for the Mediterranean from Cork.—This is no doubt asserting but the whole many

for the Mediterranean from Cork.—This is no doubt premature, but the whole naval and military strength of Great Britain and France will be put forth to check the pro-greas of the Czar. The Island of Candia has been named as likely to be the rendez-vous of the Anglo-French army. Up to the present moment, however, no actual steps have been taken to despatch a military force to the Levant, but all kinds of speculations are hazarded as to the points where such an army might best harass or obstruct the progress of the Russians.

points where such an army might best harass or obstruct the progress of the Russians. In the meantime the Russians are pouring an immense body of troops into the Princi-palities. Prince Menschukoff has been ap-pointed to superintend the government of these Provinces, and this appointment is completely in character with all the offen-sive proceedings of Russia since the spring. After a brief visit of the King of Prussia to Waraaw, the Emperor of Russia has return-ed the visit, and remained a few days at Potsdam. He left this place on the 9th inst., and returned to St. Petersburgh by

ed the visit, and remained a tew days at Potedam. He left this place on the 9th inst., and returned to St. Petersburgh by the Ostbahn to Stettin and Konigsburgh. The public are left quite in the dark re-pecting what may have passed at these interviews. A resolution of the House of Commons, declaratory of the intention of England to maintain the status quo of Europe, would have spared all the present turnoil. We do not credit the reported negociations said to be carried on at Constantinople, through M. Argyropuolo, the first dragoman of the Russian Embassy, and it is still less likely that the Turks would listen to any over-tures from that quarter. Up to the latest dates the French and English fleets were at Besiku Bay, but the general impression is, that they have now entered the Dar-danelles, orders to that effect having been sent on the 27th uit. The army of Omer Pasha is described still to be in a high state of discipline, —ready for action, —whilst the

dynasty. The accounts from Ava are un-satisfactory. The Breslauer Zeitung is informed that desertions are very frequent in the Rassian Army in the principalities, even amongst the officers; that sickness is on the un-crease there, particularly remittant fevers. The number of sick is stated at 10,000, which doubtless, as well as the previous statement, is exaggerated; there were, however, no less than 2000 men lying in the hospitals of Bucharest alone. It has already been stated that more than 800 Poles have inscribed their names at the the Turkish embassy, and offered their services to the Porte in the event of a war with Russia. From these, and from the information communicated by Capt. NEWFOUNDLAND. Contradictory opinions prevail in St. John and other parts of the inland, respecting the result of the recent delegation to England. The delegates themselves, profess to believe that Responsible Government for the colony will be granted, while others express fears that the courteey of the Co-lonial Office almost, or quite, turned the heads of the delegates, and caused them to forget the objects of their mission.

## JAPANESE EMPIRE.

Below we give an interesting account of the Japanese Empire, which has been kind-ly furnished to us by Mr. Thomas Troy. He has had extensive facilities for gaining information on the subject.

The whole empire consists of sixty-six provinces. The island Niphon contains fifty, Kew-shoo nine, Schoke five, Yezo one, Sa-dho one.

Sa-dho one. The city of Jeddo is in the province of Moo-so-she. The chart points out eight hundred and eight islands, including the four principal ones, some of which are rich in mineral productions. In the island of Sa-dho there are rich gold mines, but no one is allowed to work them but the convicts whom allowed to work them but the convicts whom the government sends there. They seldom live over three years ; — some are never al-lowed to see the daylight. They work the mines like a tail road tunnel, under the mines like a rail road tunnel, under the mountains, where some have to spend their life time, without ever seeing the sun again. On the east side of the Kew Shoo there is an abundance of coal, and a good harbour for shipping near at hand. The people mostly burn charcoal; they are forbidden to cock with the hard coal on account of the

mostly burn charcoal; they are forbidden to cook with the hard coal, on account of the gas, therefore the mines are not much at-tended to. In the island Ha-jay-joy-she-ma, all the Emperor's clothing is made. He sends a vessel there five time a year, to bring his rich cargo to Jeddo. Some of the junks are ornamented with gold plates on the side, and round the bulwarks.

The most remarkable mountain is Foog-san, in the province Soo-roong-au ; it is ten miles high, and the top is capped with
