tension storm in its history. Tornadoes descending with devastating violence upon widely separated sections caused damage estimated at \$10,000,000 in seven States: South Carolina, Georgia, Alabama, North Carolina, Virginia, Louisiana, and Arkansas. Women and children make up a large part of the known dead.

U. K. POLITICAL GOSSIP.

LONDON, May 1. Warm approval of the Budget by Liberal leaders and representatives in Parliament does not imply complete reconciliation between Liberals and Laborites, according to political writers this morning. The effect of the Laborites' attitude towards the party which put them in office and keeps them there still rashes in the breasts of the Liberal writers, and forgiveness is to depend on the line Labor takes regarding the Liberal Bill establishing proportionate representation, which comes up for its second reading in the House of Commons to-morrow. The Liberal Party meeting, held yesterday, discussed the bill and is reported to have virtually decided upon an ultimatum to the Prime Minister, demanding its passage as the price for continued Liberal support of the Government.

REMOVES RED FLAG.

GLACE BAY, May 1. A determined stand was taken by the Police authorities here to-day in connection with the carrying of a red flag in the May Day parade. When the parade had formed at its starting point, chief of police George Coetzy, went to the scene, surveyed the banners, and noticing at the front of the parade a large red banner ordered it removed from its prominent place. After short lived protests, a white banner was substituted and the red banner forced to take a position farther back in the ranks.

OTTAWA, May 1. Robert Forke, Progressive Leader to-day, announced he would support the Government budget proposal. In a two hour speech Mr. Forke made it clear he thought the tariff changes were in the right direction and merited the support of the group which he leads.

DELAWARE LOST.

HALIFAX, May 2. The Lunenburg schooner, Delaware, the Canadian entrant in the first International Schooner Race, held in 1920, in which the Gloucester boat Esperanto was the winner, was lost to-day off the Eastern Shore of this province when her spring stay snapped, causing the main mast to crash down smashing in stern of boat. Capt. William Cook and crew escaped in their dories and made shore in safety.

House Numbers and Street Signs

Editor Evening Telegram:
Dear Sir:—As a taxpayer I am writing to you a valuable paper containing the Municipal Council's plan to place house numbers on the streets. It is a very good plan, and it is a pity that the Council should have waited so long to do it. I hope the Council will do it as soon as possible. I am, Sir, your obedient servant,
G. S. Doyle

Yours respectfully,
A. TAYLOR

French Coal Industry

The extraction of coal from the French mines during the month of January this year totalled 3,761,637 tons, showing a considerable increase over the amount extracted during January last year which was 3,147,962 tons. Both months had 26 working days.

This progress is due to an increase in the daily average extraction which, as can be seen by the following figures received by the Bankers Trust Company of New York from its French Information Service, has been rising steadily and now exceeds the pre-war figure:

Year	1923	1924
January 1923	136,147 tons	
January 1924	121,064 tons	
July 1923	128,592 tons	
January 1924	144,680 tons	

The above results are due in large part to the reintegration into French territory of the Lorraine mines which produce about 17,300 tons a day. The reconstruction of the mines in the north of France is, however, also making rapid progress, the daily extraction of coal having risen from 60,230 tons in January 1923 to 80,109 tons in January 1924, a gain of 33 per cent in twelve months.

Mines in the center of France are also producing a little more now than in 1913.

In order to achieve these results, the number of workers employed has been increased from 205,508 in 1913 to 242,566 in January 1924 and 266,804 in January 1924. This increase in the number of miners has also been due to another factor—the shorter working days which came into force with the 8-hour law.

The production of metallurgical coke by the French ovens has also risen from 131,994 tons in January, 1923, to 196,939 tons in January 1924. —Bankers Trust Co., N.Y.
