often marketed as "flake."

NEW school-clothes? Yes, indeed, with all the pleasure they bring, but at the cost of only a few centsby dyeing faded or soiled garments

with SUNSET-no one can tell them from new ones.

SUNSET dyeing is actually less trouble than shopping and much more interesting and economical. SUNSET dyeing is modern, quick, clean dyeing. No more stained hands or spoiled utensils. No more tedious drudgery-SUNSET dyes in 30 minutes-and lasts.

Try dyeing a child's faded blouse with SUNSET—it will take just half an hour. And what new delight it will give to its little wearer! Then you will go on with a dozen other garments-your own as well as the children's. And it makes no difference what fabrics you want to dye-SUNSET is just as sure and fast for silk and wool as it is for cotton and linen. Furthermore, it is the only fast dve that cleans as it dyes.

On Sills and Windows. Hot weather means plenty of open people are not equally susceptible to windows, and consequently an invasthe bites of insects. Some persons ion of summer flies and pests, but if suffering comparatively little incon- the woodwork of the windows is washvenience from their attacks while ed every morning, with a solution of others again fall an early victim of quassia, it will often be very effective the first midge or mosquito that in keeping them out of the rooms. ies very much with different people, to them four pints of cold water, and seep better than if made in hot water. A good disinfectant can be used instead of quassia, if the smell is not bjected to. A good many people con-

sider them too medicinal. Effect of Flowers.

Strong scented flowers should not used in a room if summer pests are very plentiful, as these attract them. Comonile flowers as excellent is a defence against midges as the lowering heads crushed down can be used to dust over the window sills. oil of peppermint is another useful thing to keep them at bay, and so is oil of lavender, but the latter is sup posd to attract moth. Nothing is really better than a solution of diluted ammonia, but unfortunately this will rust any metal that is in its neighbourhood and also "spot" colored materials, so it must be used with caution.

Evening is the time when pests are most active and the light in bedrooms attract them, so it is worth a little trouble to keep them out and ensure a good night's rest. A white muslin arm. curtain dipped into a solution of quassia and then placed across the open window will act as a useful barrier: if a small bowl of quassia solution is placed on the ground or on a table close by, and one end of the muslin is standing in the bowl, the curtain will keep moist throughout the night since the moisture will creep up.

Making the Tiolet.

The bath must be used as a special D'Oisy Gives means of fortifying one's self against bites and stings. Add to the bath water some toilet ammonia or a cloudy ammonia solution. As soon as the body has been dried a preparation must be used that will keep away pests; it may be a powder or a lotion, if it is the latter let it dry on, do not wipe it off. A little menthol mixed with an ordinary toilet powder will be found very effective, and will be quite harmless to the under-garments. It is now possible to obtain from the druggist excellent preparations against insect attacks which should be included in the toilet outfit for summer

For Face and Neck.

A touch of cream on the face is sufficient to prevent a bite or sting, unless it is from a fairly large pest; it is a proof against midges, at least, and if there is a little powder it is an added safeguard, but let the powder have its anti-sting ingredient such a

little is needed. When discussing how to protect the face, one must not forget the neck for it is just as important, both for comfort and appearance sake. putting on cream or powder let it go right under the top of the frock, for these tiny foes have a habit of creeping underneath it. If there is fear of a cream greasing the frock use only powder on the neck. At bedtime use plenty of tiolet cream on the

Loan to Restore Devastated Areas

The Hat Trick

A farmer was taking his son, aged nine, to town. Whilst in the train he attempted to amuse the lad by showing him a few tricks.

Snatching his son's cap from his head he pretended to throw it out of the window, at the same time, unknown to the boy, hiding it under his

"Now," said the father, "watch daddy whistle your hat back." To the astonishment of the boy, the hat reappeared.

Before the train reached its destination the little boy jumped up suddenly, snatched his father's hat from his head, and, throwing it out of the window, said, triumphantly, "Whistle that back, daddy!"

Plane to Japan

Tokio, July 13. (A.P.)-Captain Georges Pelletier D'Oisy, the French aviator, who recently completed a flight from Paris to Tokio, has donated the airplane in which he made the last leg of his journey from Shanghai to the Japanese army.
