NOW SUIT FROCK

Close Relative of Coat Dress Introduced Last Year.

Satin and Velvet in Combination Shown in Many of Smartest Tailored Gowns for Fall.

The sketch illustrates a simple but extremely smart little suit dress made, preferably, of serge and with trimming of inch-wide flat braid. The skirt is plaited, but without flare. The upper part of the dress is cut with length-

ened back section, so that a suit is closely simulated.

The garment is a near relative of the coat dress introduced last year, and which enjoyed a season of popularity. The coat dress in its most distinctive form was open from collar to edge of skirt hem, and designers claim that the dress suit has advantages over this because the garment slips over the head and has a very conservative skirt, whereas the coat dress that opened all the way down the front found many objectors on account of its tendency to flare open unattractively if a button dropped off or was left unfastened.

Suit dresses are shown that so closely resemble actual two-piece suits that it is difficult to distinguish them, and for fall and early winter wear these garments will undoubtedly be in favor.

If a dress of this type is to show up to the best possible advantage it must be well tailored and lined very much like a suit.

Satin and velvet in combination are shown in many of the smartest tailored frocks for fall. The skirt will usually be made of the satin, with tunic or overskirt and bodice of velvet cording. Sleeves may be of either fabric. Usually the bodice is high-necked and finished with a choker collar of fur.

Velvet and georgette are attractively combined in some of the loveliest afternoon dresses shown. The lower half of the skirt will be fashioned of velvet and the upper part of georgette with velvet bodice and georgette sleeves. The bodice that is cut surplice style continues to be featured.

FASHION ACCENTS THE CUFF

It Appears This Season Not Only on the Sleeve But on Skirt, Blouse and Glove.

A dress feature that fashion is accenting just now is the cuff. She has shifted its position on the sleeve. Instead of being at the wrist, its old accustomed place, we now see it at the elbow. Then, again, when it is used at the bottom of the sleeve, it is often so deep that it reaches to the elbow. Skirts have cuffs, too, this season, says the Woman's Home Companion. Not a few of the smartest are finished with a cuff hem. The cuff, which turns up on the right side of the skirt, varies from six inches to three-fourths of a yard.

Even jackets are finished with a cuff. The little jacket is turned back in cuff form two or three inches above the normal waistline.

The new gloves are keeping up with

the style procession. They, too, have cuffs. Sometimes the cuff is in the form of a contrasting kid band, or the glove is in the gauntlet form with V-shaped insets of contrasting kid or suede.

As to Belts for Fall.
The belt may be arranged in a variety of ways on both afternoon and street dresses. For the long waisted style there is the wide, straight belt, the sash belt that loops and ties is favored for certain models, also a three yard long belt which encircles the waist and wraps once or twice about the hips, looping either front, back or side.

FOOLISHNESS OF WORRY.

Forcefully Set Forth in the French Soldier's Philosophy.

"Everything might be worse than it is," is the cheerful conclusion of the French soldier, according to Kathleen Burke in "The White Road to Verdun." Here is the way she sums up the philosophy of the man in the ranks: "Of two things one is certain—either you're mobilized or you're not mobilized.

If you're not mobilized there's no need to worry; if you're on the front of two things one is certain—either you're behind the lines or you're on the front.

If you're behind the lines there is no need to worry; if you're on the front of two things one is certain—either you're resting in a safe place or you're exposed to danger.

If you're resting in a safe place there is no need to worry; if you're exposed to danger, of two things one is certain—either you're wounded or you're not wounded.

If you're not wounded there is no need to worry; if you are wounded of two things one is certain—either you're wounded seriously or you're wounded slightly.

If you're wounded slightly there is no need to worry; if you're wounded seriously of two things one is certain—either you recover or you die.

If you recover there is no need to worry; if you die you can't worry. Not bad philosophy, in the trenches or out.

KILLED HIS TWENTY MEN.

An Incident of the War of the Boxer Uprising in China.

"Speaking of barbaric warfare," said an army officer who was in China at the time of the Boxer uprising, "I remember one day when the company with which I was attached in China was in a position to witness the execution of twenty rebels. The men had been caught with our assistance, and the leader of the Chinamen thought that we deserved the privilege of seeing them die.

"Our commander was particularly impressed with the looks of one of the rebels. He was a fine built fellow, about nineteen years old, and his face, even five minutes before he was scheduled to die, was wreathed in smiles. Our leader determined to save the fellow if possible and asked the commander of the executing squad to spare the young rebel.

"I can't spare him," the man replied. "I have been ordered to execute the whole twenty rebels."

"After much persuasion he agreed to allow the man to live. To follow up his orders, however, he summoned a local policeman, placed him in the squad and had his head cut off with those of the nineteen rebels. He killed twenty, followed out orders and pleased a visitor. He was well satisfied."

English Prison Pits.

Prison pits were vaults in which criminals in England were kept at night, chained together. There was one at Bristol which was in use as late as 1815. Down eighteen steps, it was only seventeen feet in diameter by nine feet high, and seventeen men were consigned to it every night. Even more typical was Warwick jail pit, which was occupied at least until 1797. It was an octagonal dungeon twenty-one feet in diameter and almost nineteen feet underground. In the middle was a cesspool, and beside it ran a stream of water which served the prisoners for drinking purposes. To this awful cell forty-two men were consigned every afternoon at 3:45, to remain there until after daylight the following morning.

Reindeer of Alaska.

The Alaska reindeer, which, curiously enough, are wards of the United States department of education, have increased from the small herd brought from Siberia in 1892 until they now number well over 70,000, that, too, in spite of the fact that about 9,000 were killed last year for meat and skins. Two-thirds of the reindeer belong to the natives, for whom they are solving the problems of food, clothing and transportation. The rest belong to the missionaries, the Lapp immigrants and the government.
