Truth About 'Maine Will Now Be Learned

The army board appointed by Secretary Dickinson in July to devise means of raising the 'Maine' and removing the bodies of her dead from her wreck has decided that it duty comprehends the placing of her hull in such a position that an expert investigation can be conducted to determine whether the explosion was an interior or an exterior one.

Mr. Hervey secured a patent on the inventor's idea and brought him to Mattland and fitted up a building with the necessary tanks and apparatus and has proved the success of the plan.

NEW PEAT GAS INVENTION. Mattland, Ont., September 24—To this village belongs the honor of introducing the world one of the most important inventions of modern times, the manufacture of light, heat and commercial power from peat.

Mr. R. G. Hervey, while in Quebec last summer, came across a man with an entirely new idea in regard to the use of peat. Instead of trying to dry it and press it to burn like coal, his theory was that peat being full of cells charged with different gases and these gases being very inflammable as is proved by the natural phenomenon of lights floating over bogs known as will o'wisp, by putting this bog peat through some process he collects this gas and uses it in the same method as natural gas or the well-known coal gas.

Mr. Hervey secured a patent on the inventor's idea and brought him to Mattland and fitted up a building with the necessary tanks and apparatus and has proved the success of the plan.

Fear That the Fisheries Will Be Depleted

Prominent Fish Dealers Say That the Industry is on Verge of Ruin. St. John, Sept. 25—The gravest fears are expressed by prominent fish dealers who reached the city today that the fishing industry in the vicinity of this port and in the Bay of Fundy waters in general is on the verge of ruin.

"There is no doubt that the whole industry is being depleted," said one man. All kinds of fish are very scarce and prices are higher than ever before. It is felt that the fishermen are themselves largely to blame, and they are charged with catching the smaller fish to make up for the scarcity of larger ones.

"This is a time," wrote Mr. Seton in his Birch Bark Roll, which has been incorporated with the Baden-Powell handbook for use in this country.

Not long ago a benevolent rich man impressed with this idea chartered a steamer and took some hundreds of alum boys up to the Catskills for a day in the woods. They were duly landed and told to "go and have a glorious time."

Sinking Spells Every Few Days

"At the time I began taking Dr. Miles' Heart Remedy I was having sinking spells every few days. My hands and feet would get cold; I could scarcely breathe, and could feel myself gradually sinking away until I would be unconscious.

For twenty years we have been constantly receiving just such letters as these. There is scarcely a locality in the United States where there is not some one who can testify to the merits of this remarkably successful Heart Remedy.

CHEAPER FUEL. Commercial Peat Being Successfully Produced.

At the exhibition last week the Dominion department of mines made a very successful demonstration of peat fuel from the government plant at Alfred, Ont.

Youth, with all its reputation for joy and interest, is really usually full of sorrow and boredom. When we are young we expect so much of life, we are so absolutely wrapped up in ourselves, so completely selfish, in our ideals of happiness, that the disappointments and disenchantments are always correspondingly bitter and deep.
