Green's Making of England.....	10
Canadian Expositors of Kant.....	11
Caird's Problem of Philosophy.....	11
TABLE TALK.....	12

The DOMINION REVIEW is an attempt to meet the existing want of a Canadian Weekly Critical Journal. It aims to combine along with the highest literary excellence an independent discussion of the more important questions in Politics and Literature as they arise from time to time.

The exponent of the great modern principles of civil and religious freedom in the widest acceptance of the term, the DOMINION REVIEW is the organ of no party—political or otherwise. Independent of party necessities or interests, it will seek to create and maintain a sound public opinion on all the leading questions of the day, and an intelligent interest in the affairs of other nations.

Literary criticism will form a special feature and receive a prominent place in its pages. The principal works in the various departments of Literature, Science and Art as they appear will be carefully selected, and a critical account of them placed before the public, who will thus be made acquainted with the best that is known and thought throughout the world.

The columns of the DOMINION REVIEW will be open to correspondence on all questions of public interest, the aim of its promoters being to establish a Journal which shall at once stimulate thought, and secure the support and co-operation of men of culture throughout Canada.

Invite the attention of Ministers and
Students to

Young's Analytical Concordance.

The importers of the English Edition having repeatedly advertised that the American contained 2,000 errors, Dodd, Mead & Co. have, at great expense, had the work carefully collated, word for word, with the latest English Edition, and every error or omission rectified.

In addition to this, their examination has brought to light many inaccuracies in the English Edition itself, all of which have been corrected.

The book as published by them, bearing on the title page the words "Students' Edition," is therefore the most correct in existence.

The many omissions which Dr. Young discovered in his work after the early editions were issued, he inserted in the plates. To gain room he cut out the text of the articles preceding or following the omitted word. He then inserted his forgotten word, giving reference only, but no text. Any person interested will find in the words "Holy Ghost" a case in point. Here it might easily happen that it would be necessary to look out forty references before the correct one was found. In Dodd, Mead & Co.'s edition the fact of such omission is noted by an asterisk, and the omitted matter with text in full is found in an appendix.

In typographical appearance, size and thickness, this edition is in every way the equal of the English Edition.
