will go into the many many thousands of MASSEY-HARRIS Farm Machines and Implements being made for the very propitious season of 1898.

The following is an extract from a letter just received at the Head Offices of Massey-Harris Co., Limited—the letter is from one of three large Malleable Iron Foundries which supply the Company with Malleables:

*"In looking over our Foundry books this morning we find 102 Molders are working on your patterns, which means an output of 17 to 18 tons daily. Considering that for each Molder an average of at least two other men are employed in our process, it means a Malleable Iron Plant of very respectable size is running on your work alone."*
