THE TRUE WITNESS AND CATHOLIC CHRONICLE.

The Wasting of a Consumptive and the Wasting of Bables and Children-Sorofuls, Ansemia and Other Forms of fliness Discussed-Coughs and Colds Reveal a Weakened Condition.

In the obituary notices of the late Prof. Hermann von Helmholtz, the German scientist, were references to one of his earlier works "On the Consump-tion of Tissue During Muscular Action." In this work Prof. Helmholtz set the theory forth as an established fact that wherever there is muscular action there is also a wasting, or rather a consump tion of tissue.

tion of thesue. The body is constantly changing. There is wasting going on all the time. Food is designed to counteract this wasting, and if the organs of the body are in a healthy state food does do its work in nourishment. But the diges-tive and vital organs get out of tune are one on while so that an extra every once in a while, so that an extra nourishment, one that is concentrated and easy of assimilation, is needed in order to keep up a normal condition of bealth.

If this extra nourishment is not taken the wasting which goes on incessantly soon impairs health. One of the first signs of a weakened, poorly-nourished body is taking cold easily. Colds are such common things that people are very apt to neglect them. They do not know that the cold reveals a weakened condition but after taking cold several condition, but after taking cold several times they find it harder work to recover the semblance of health again.

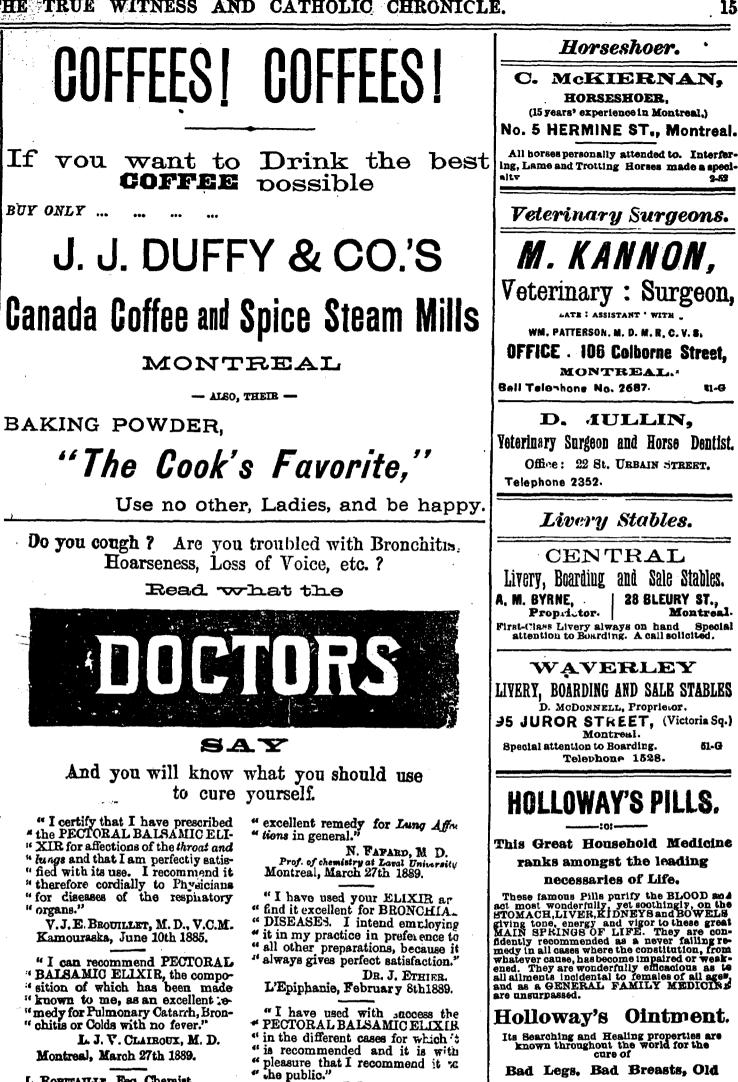

The common way to cure a cold or a cough is to take some household specific. or when a person feels run down in health he thinks he needs a tonic or stimulant.

The truth is, however, ordinary specifics and tonics or stimulants, for coughs and colds, afford only temporary relief. They are merely superficial means of relieving the local trouble, but they do not give the nourishment necessary to strengthen the system and overcome the wasting tendencies.

It is because Scott's Emulsion promotes the making of healthy tissue, enriches the blood, and gives vital strength that physicians give it such unqualified endorsement. Scott's Emulsion is quick to relieve inflammation of Throat and Lungs, and its power to cure the most stubborn cough is unquestioned. But this is only part of its work. Scott's Emulsion makes the system able to ward off disease and other ailments.

This subject of wasting is almost inexhaustible. Scrofula results in a wasting of the vital elements of the blood, and Ansemia is simply no blood at all. Consumption is probably the worst form of wasting. In all of the early stages of this disease Scott's Emulsion will effect a cure. It requires time to recover after a patient is once into Consumption, but there are numerous cases where Scott's Emulsion has cured persons who had got so far that they raised quantities of blood.

The wasting tendencies of babies and children are known to too many unhappy parents. There does not in thousands of instances seem to be any cause for шен growing thin, but as a matter of fact their food does not nourish them and the babies and children do not thrive. The babies are weak and children seem to grow only one way. Now it costs only 50 cents to try Scott's Emulsion, and you will find that it will do more for your baby or your child than all the rest of the nourishment taken. Scott's Emulsion makes babies fat and children robust and healthy. It takes away the thin, haggard look in the pinched faces of so many children. Another one of the many uses of Soott's Emulsion is the way it helps mothers who are nursing babies. It gives them strength and makes their milk rich with the principles of food all babies need. Scott's Emulsion is not a secret mixture. Its formula is furnished to physiclans and has been endorsed by physicians for twenty years. It has a record unequaled by any other preparation in the world. For sale by all druggists, 50 cents and \$1.00. Pamphlet mailed by Scott & Bowne, Belleville, on application.
