

# Birks Silverware

The handsome sterling silver tea set and graceful table silver pattern lend a refined richness to the well appointed dining table.

Every hostess is proud of her silverware, especially so if made by "Birks"—in Canada. We manufacture our silver and know just how good it is. Its lasting qualities will be recognized by generations to come.

We particularly mention our **seven family patterns** of spoons and forks—the Read, Plain Old English Chantilly, Louis XV, Kings, Thread, and Strasbourg. These have been selected from among the many designs—they are the favorites.

Our sterling silver tea sets and other table articles, prize trophies and presentation sets are to be seen in the leading homes of Canada.
