

*From J. P. LITCHFIELD, ESQ., M.D., Professor of Forensic and State
Medicine, Queen's University; Medical Superintendent of the
Rockwood Lunatic Asylum.*

I have been acquainted with Dr. John Bell both while engaged in the study of Medicine, and since he has entered upon its practice. I believe him to be a very zealous, pains-taking, able and humane practitioner, and that he will discharge with skill and fidelity any duties that may be confided to him in a public institution.
