|------|------|---|
| | | exceedingly, and I should have taken it to be the same if the pedicels were not solitary, and, as Mr. Kerr observes, the germ polyspermous, which in <i>Noline</i> is only 3-spermous. |
| 242 | | <i>Veratrum viride</i> , <i>adde</i> <i>Helonias viridis</i> . <i>Bot. mag.</i> 1096. |
| | | <i>Veratrum angustifolium</i> .—Of this species I have seen a fine specimen in the Sherardian Herbarium, under the name <i>Phalangium canadense majus ramosum</i> , <i>Iridis folio</i> , by which it appeared to grow likewise in Canada. The panicle was monoic not dioic, as I observed it in Virginia, the seeds lanceolate, membranaceous. |
