ART. XIV.—*On the Earlier Cretaceous Rocks of the North-western portion of the Dominion of Canada*; by GEORGE M. DAWSON, Assistant Director Geological Survey of Canada.

IN the Report of Progress of the Geological Survey of Canada for 1872-73, the late Mr. James Richardson first described an important series of rocks occurring in the Queen Charlotte Islands, which Mr. E. Billings, on paleontological grounds, in an Appendix to the same report, characterized as probably lowest Cretaceous or Upper Jurassic. A further and
