FOOD EXPLOITATION MERCILESSLY EXPOSED

Remarkable Film Play, "The Public Be Damned," Awakens Intense Interest.

Ten million tons of food is what Lord Rhondda, the British food controller, says will be needed within the next twelve months. Ten million tons of cereals, bacon, beef and cheese will be needed by Great Britain, France and Italy from the United States and canada within the time named. We all realize that to make good the shortage in production in the allied countries and to feed the ever-increasing armies this country and its neighbor are being called upon for increased production in a manner which transcends all the experience of the past. We must be equal—in this country and in the United States to that call. For that purpose it is necessary that we should conserve every ounce of food available. To that end we are already taking part in a campaign of household thrift and eco-

nomy. But after all, food conserva-

tion is not everything. Our people, now the need is brought home to them, are willing to do every-thing within their power to help win the war for the allies. They are willing to stint themselves even in the barest necessaries of life if such eco nomy is really essential to victory. But they have been disheartened indeed by the exposure of food profiteering and so forth which goes on from day to day in the press and elsewhere. They see that while they are sked to take part in a most rigorous campaign of economy there are others who, by holding up the people's food, are waxing fat out of their necessities. They resent the extortion to which they are exposed at the hands of the profiteers. Of what kind this extortion is and to what a fine art it has been reluced and how scientifically the whole diabolical game of exploitation is carried on-all these things are brought out with convincing fidelity and force in "The Public Be Damned," the toplay sensation of the hour, which is being shown at the Strand Theatre for the whole of this week, and which is creating such a furore in Toronto perhaps a photoplay has never created here before.

FOR BELGIAN RELIEF. Committee Reports Splendid List of Superriptions For Past Week.

The Belgian Relief Committee of stomach troubles, I have been forced to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The real trouble, that which causes all the pain and difficulty, is acid in the stomach, usually due to, or aggravated by food fermentation. Acid irritates the delicate lining of the stomach, and food fermentation causes wind, which distends the stomach abnormally causing that full, bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach is usually healthy and normal, but, irritated almost past endurance by these the Toronto Women's Patriotic League, 80 West King street, report
